

## **Research**

The Department of Physics, established in 1967 and upgraded to a Research Department under the University of Calicut in 2019, has become a center for quality research in material science and photovoltaics. Currently, the department has two research guides and has produced two PhD graduates to date. The research lab is well-equipped thanks to the support through DST-FIST funding, along with project support from BRNS-DAE, UGC, and KSCSTE. In pursuit of contemporary academic goals, the department actively organizes international workshops, hosts exhibitions and conducts seminars.

### **Research Guides**

<b>S.No</b>	<b>Name of research guide</b>	<b>Topic of interest</b>
1	Dr. Lakshmi M	Material science and Photovoltaics
2	Dr. Sr. Jessy Mathew N	Material science and Photovoltaics
