UG PROGRAMME IN BOTANY

PREFACE

The revised Curriculum for Undergraduate Programme of B.Sc. Botany focuses on imparting knowledge in basic and applied aspects of Botany. Due importance is given to fundamental and modern aspects of Botany, spanning many specialties and interests. An attempt has been made to make the study of Botany interesting and enjoyable, and to keep with the speed with which technology advances. Formulation of the syllabus has been done by revamping the existing syllabus, with an understanding that the syllabus is addressing the 'digital native' generation.

The revised syllabus of B.Sc. Botany has been prepared in a participatory manner, after discussions with experts in the subject and by collecting suggestions from faculty of all colleges under Calicut University. As far as possible, the suggested modifications from the teaching community have been incorporated into the syllabus. During the preparation of the syllabus, the existing syllabus, the syllabi of XIth & XIIth standards, M.Sc. Botany syllabus of Calicut University, UGC model curriculum and the syllabi of other universities have also been referred to. Care has been taken to ensure that the syllabus is compatible with the syllabi of other universities at the same level.

Concern for ever increasing pollution, biodiversity destruction and climate change is at its highest than ever. Keeping these issues in view, revision of the curriculum at the undergraduate level is done focusing towards creating awareness on these aspects.

AIMS AND OBJECTIVES OF THE PROGRAMME

- The fundamental objective of the curriculum is to impart an effective science education at the undergraduate level, exposing students to recent trends and developments in the subject.
- Creating scientific temper is another major objective of this curriculum. Incorporating research components along with a sound academic foundation enables students to develop independent critical thinking. Sufficient emphasis is given for training in laboratory skills and instrumentation. The curriculum is meant to inspire creativity and combine passion with critical thinking skills in students who one day will be the citizens working to convert the world to more sustainable systems.
- The major thrust given here is to develop an environmental concern in all activities performed by the students. 'Go green' has been taken as the motto of the syllabus. The syllabus has been designed in a way to help creating awareness of environmental impacts due to development of

science and technology and the urgent need of conservation of nature without destruction of natural resources.

- Creating scientific temper is another major objective of this curriculum. Incorporating research components along with a sound academic foundation enables students to develop independent critical thinking. Sufficient emphasis is given for training in laboratory skills and instrumentation.

PROGRAMME OUTCOMES (POs)

1. **Critical Thinking:** Take informed actions after identifying the assumptions that frame our thinking and actions, checking out the degree to which these assumptions are accurate and valid, and looking at our ideas and decisions (intellectual, organizational, and personal) from different perspectives.
2. **Problem Solving:** Understand and solve problems of relevance to society to meet the specified needs using the knowledge, skills and attitudes acquired from humanities/sciences/mathematics/social sciences.
3. **Effective Communication:** Speak, read, write and listen clearly in person and through electronic media in English and in one Indian language, and make meaning of the world by connecting people, ideas, books, media and technology.
4. **Effective Citizenship:** Demonstrate empathetic social concern and equity centered national development, and the ability to act with an informed awareness of issues and participate in civic life through volunteering.
5. **Environment and Sustainability:** Understand the issues of environmental contexts and sustainable development.
6. **Self-directed and Life-long Learning:** Acquire the ability to engage in independent and life-long learning in the broadest context of socio-technological changes

PROGRAMME SPECIFIC OUTCOMES (PSOs)

1. **Scope and importance of Botany:** Understand scope and importance of Botany
2. **Environmental concern:** Create awareness on natural resources and their importance in sustainable development, analyze the importance of biodiversity conservation, estimate biodiversity loss and develop conservation strategies.
3. **Scientific temper:** Develop scientific temper and undertake scientific projects.

4. **Practical applications:** Identify and classify plants according to the principles of plant systematics, apply techniques like plant propagation methods, organic farming, mushroom cultivation, preparation of biofertilizers, biopesticides etc.
5. **Awareness on life processes:** Understand plant life processes, biomolecules, and basic hereditary principles.

UG PROGRAMME – AN OVER VIEW

DEFINITIONS

- **Programme** means the entire course of study and examinations for the award of a degree.
- **Duration of programme** means the time period required for the conduct of the programme. The duration of a UG degree programme shall be six semesters distributed in a period of 3 years or eight semesters in a period of 4 years.
- **Academic Week** is a unit of five working days in which distribution of work is organized from day one to day five, with five contact hours of one hour duration on each day. A sequence of 18 such academic weeks constitutes a semester.
- **Semester** means a term consisting of 18 weeks (16 instructional weeks and two weeks for examination).
- **Course** means a segment of subject matter to be covered in a semester.
- **Common course** means a course that comes under the category of courses, including compulsory English and additional language courses, the selection of which is compulsory for all students undergoing UG programmes.
- **Core course** means a compulsory course in a subject related to a particular degree programme.
- **Open course** means a course which can be opted by a student at his/her choice.
- **Complementary course** means a course which is generally related to the core course.
- **Improvement course** is a course registered by a student for improving his/her performance in that particular course.
- **Ability Enhancement course/Audit course** is a course which is mandatory as per the directions from the Regulatory authorities like UGC, Supreme Court etc.
- **Credit (C)** is a unit of academic input measured in terms of weekly contact hours/course contents assigned to a course.
- **Extra Credit** is the additional credit awarded to a student over and above the minimum credits required in a programme, for achievements in co-curricular activities and social activities conducted outside the regular class hours, as decided by the University. For

calculating CGPA, extra credits will not be considered.

- **Letter Grade** or simply ‘Grade’ in a course is a letter symbol (O, A+, A, B+, B, C, P, F, I and Ab). Grade shall mean the prescribed alphabetical grade awarded to a student based on his/her performance in various examinations. Each letter grade is assigned a ‘**Grade point**’ (G) which is an integer indicating the numerical equivalent of the broad level of performance of a student in a course.
- **Grade Point** means point given to a letter grade on 10 point scale.
- **Semester Grade Point Average’ (SGPA)** is the value obtained by dividing the sum of credit points obtained by a student in the various courses taken in a semester by the total number of credits in that semester. SGPA shall be rounded off to three decimal places. SGPA determines the overall performance of a student at the end of a semester.
- **Credit Point’(P)** of a course is the value obtained by multiplying the grade point (G) by the credit (C) of the course: $P=G \times C$
- **Cumulative Grade Point Average’ (CGPA)** is the value obtained by dividing the sum of credit points in all the semesters taken by the student for the entire programme by the total number of credits in the entire programme and shall be rounded off to three decimal places.
- **Grade Card** means the printed record of students’ performance, awarded to him/her.
- **Course teacher:** A teacher nominated by the Head of the Department shall be in charge of a particular course.
- **Strike off the roll** A student who is continuously absent for 14 days without sufficient reason and proper intimation to the Principal of the college shall be removed from the roll.

PROGRAMME STRUCTURE (excluding common courses)

- **CORE COURSES:**

Core courses are the courses in the major (core) subject of the degree programme chosen by the student. Core courses are offered by the parent department.

- **COMPLEMENTARY COURSES:**

Complementary courses cover one or two disciplines that are related to the core subject and are distributed in the first four semesters.

- **OPEN COURSES:**

There shall be one open course in core subjects in the fifth semester. The open course shall be open to all the students in the institution except the students in the parent department. The students can opt that course from any other department in the institution. Each department can decide the open course from a pool of three courses offered by the University. Total credit

allotted for open course is 3 and the hours allotted is 3. If there is only one programme in a college, they can choose either language courses or physical education as open course.

- **ABILITY ENHANCEMENT COURSES/AUDIT COURSES:**

These are courses which are mandatory for a programme but not counted for the calculation of SGPA or CGPA. There shall be one Audit course each in the first four semesters. These courses are not meant for class room study. The students can attain only pass (Grade P) for these courses. At the end of each semester there shall be examination conducted by the college from a pool of questions (Question Bank) set by the University. The students can also attain these credits through online courses like SWAYAM, MOOC etc. (optional). The list of passed students must be sent to the University from the colleges at least before the fifth semester examination.

Table 1: THE LIST OF AUDIT COURSES IN EACH SEMESTER WITH CREDITS

Sl no	Semester	Course	Credit
1	1	Environment Studies	4
2	2	Disaster Management	4
3	3	*Human Rights/ Intellectual Property Rights/ Consumer	4
4	4	*Gender Studies/ Gerontology	4
Total			16

* Colleges can opt any one of the courses.

- **CREDITS:**

A student is required to acquire a minimum of 140 credits for the completion of the UG programme, of which 120 credits are to be acquired from class room study and shall only be counted for SGPA and CGPA. Out of the 120 credits, 38 (22 for common (English) courses + 16 for common languages other than English) credits shall be from common courses, 2 credits for project/corresponding paper and 3 credits for the open course. The maximum credits for a course shall not exceed 5. Audit courses shall have 4 credits per course and a total of 16 credits in the entire programme. The maximum credit acquired under extra credit shall be 4. If more Extra credit activities are done by a student, that may be mentioned in the Grade card. The credits of audited courses or extra credits are not counted for SGPA or CGPA.

- **EXTRA CREDIT ACTIVITIES:**

Extra credits are mandatory for the programme. Extra credits will be awarded to students who

participate in activities like NCC, NSS and Swatch Bharath. Those students who could not join in any of the above activities have to undergo Calicut University Social Service Programme (CUSSP). Extra credits are not counted for SGPA or CGPA.

Table-2 CREDIT DISTRIBUTION OF B.Sc. BOTANY PROGRAMME

Semester	Common		Core course	Complementary course		Open course	Audit course	Extra credits	Total
	English	Additional Language		Chemistry	Zoology				
II	4+3	4	3	2	2		4		18
III	4	4	3	2	2		4		15
IV	4	4	3+4**	2+4**	2+4**		4		27
V			3+3+3+3			3			16
VI			3+3+3+3+3 2*+5**+5**					4	26
Tot	22	16	55	12	12	3	16	4	140

* Credits of Project Work **Credits of practical paper

- **ATTENDANCE:**

A student shall be permitted to appear for the semester examination, only if he/she secures not less than 75% attendance in each semester. Attendance shall be maintained by the Department concerned. Condonation of shortage of attendance to a maximum of 10% in the case of single condonation and 20% in the case of double condonation in a semester shall be granted by University remitting the required fee. Benefits of attendance may be granted to students who attend the approved activities of the college/university with the prior concurrence of the Head of the institution. Participation in such activities may be treated as presence in lieu of their absence on production of participation/attendance certificate (within two weeks) in curricular/extracurricular activities (maximum 9 days in a semester). Students can avail of condonation of shortage of attendance in a maximum of four semesters during the entire programme (Either four single condonations or one double condonation and two single condonations during the entire programme) . If a student fails to get 65% attendance, he/she can move to the next semester only if he/she acquires 50% attendance. In that case, a **provisional**

registration is needed. Such students can appear for supplementary examination for such semesters after the completion of the programme. Less than 50% attendance requires Readmission. Readmission is permitted only once during the entire programme.

- **PROJECT WORK/ THEORY COURSE ON RESEARCH METHODOLOGY:**

Every student of a UG degree programme shall have to work on a project of 2 or shall write a theory course based on Research Methodology as per the curriculum. College shall have the liberty to choose either of the above. Project work at UG level shall be of group nature, during the tenure of Vth and VIth semester. A group of not more than five students can undertake one project under the supervision of a faculty member as per the curriculum.

- **GRACE MARKS:**

Grace Marks may be awarded to a student for meritorious achievements in co-curricular activities (in Sports/Arts/NSS/NCC/Student Entrepreneurship) carried out besides the regular hours. Such a benefit is applicable and limited to a maximum of 8 courses in an academic year spreading over two semesters. In addition, maximum of 6 marks per semester can be awarded to the students of UG Programmes, for participating in the College Fitness Education Programme (COFE).

REGISTRATION

Each student shall make an online registration for the courses he/she proposes to take, in consultation with the Faculty Adviser within two weeks from the commencement of each semester. The college shall send a list of students registered for each programme in each semester giving the details of courses registered, including repeat courses, to the University in the prescribed form within 45 days from the commencement of the semester.

A student shall be normally permitted to register for the examination if he/she has required minimum attendance. If the student has a shortage of attendance below 65% in a semester, the student shall be permitted to move to the next semester (if the attendance is more than 50% - Provisional registration) and can write the examination for the entire courses of the semester in which shortage of attendance occurs as supplementary examination only after the completion of the entire programme. In such cases, a request from the student may be forwarded through the Principal of the college to the Controller of Examinations within two weeks of the commencement of the semester. If the attendance is less than 50%, the student is ineligible to continue the programme and has to seek readmission. **There will not be any Repeat semester in CBCSSUG 2019.**

A student who registered for the course shall successfully complete the programme within 6

years from the year of first registration. If not, such candidate has to cancel the existing registration and join afresh as a new candidate.

For open courses there shall be a minimum of 10 and maximum of 75 students per batch. For other courses existing pattern will be followed.

Those students who have followed the UG Programmes in annual pattern or Choice based Credit & Semester System pattern can cancel their earlier registration and register afresh for CBCSSUG 2019 scheme in the same discipline or a different one.

The students who have attendance within the limit prescribed, but could not register for the examination have to apply for **Token registration**, within two weeks of the commencement of the next semester.

EXAMINATION

There shall be University examinations at the end of each semester.

- **PRACTICAL EXAMINATION**

Practical examinations shall be conducted by the University as prescribed by the Board of Studies. There will be practical examinations at the end of 4th semester and 6th semester. Practical examination of 4th semester will be of 3 hrs duration. Practical examination of 5th and 6th semesters will be of 4 hrs duration.

- **EXTERNAL VIVA-VOCE,**

External viva voce if any, shall be conducted along with the practical examination/project evaluation.

The model of question papers may be prepared by the concerned Board of Studies. Each question should aim at – (1) assessment of the knowledge acquired (2) standard application of knowledge (3) application of knowledge in new situations.

Different types of questions shall possess different marks to quantify their range.

- **PROJECT EVALUATION**

Project evaluation shall be conducted at the end of sixth semester. 20% of marks are awarded through internal assessment. Internal assessment of the project will be based on its content, method of presentation, final conclusion and orientation to research aptitude.

- **AUDIT COURSE:**

The students can attain only pass (Grade P) for these courses. At the end of each semester there shall be examination conducted by the college from a pool of questions set by the University. The students can also attain the credits through online courses like SWAYAM, MOOC etc. The

College shall send the list of passed students to the University at least before the commencement of fifth semester examination.

- **IMPROVEMENT COURSE:**

Improvement of a particular semester can be done only once. The student shall avail of the improvement chance in the succeeding year after the successful completion of the semester concerned. The students can improve a maximum of two courses in a particular semester (for SDE/Private registration students also). The internal marks already obtained will be carried forward to determine the new grade/mark in the improvement examination (for regular students). If the candidate fails to appear for the improvement examination after registration, or if there is no change in the results of the improved examination, the mark/grade obtained in the first appearance will be retained.

Improvement and supplementary examinations cannot be done simultaneously.

- **MODERATION:**

Moderation is eligible as per the existing rules of the Academic Council.

EVALUATION AND GRADING

Mark system is followed instead of direct grading for each question. For each course in the semester letter grade and grade point are introduced in 10-point indirect grading system as per guidelines given in Annexure-1

- **COURSE EVALUATION**

The evaluation scheme for each course shall contain two parts

1) Internal assessment 2) External Evaluation

20% weight shall be given to the internal assessment. The remaining 80% weight shall be for the external evaluation.

- **INTERNAL ASSESSMENT**

20% of the total marks in each course are for internal examinations. The marks secured for internal assessment only need to be sent to University by the colleges concerned.

The internal assessment shall be based on a predetermined transparent system involving written tests, Class room participation based on attendance in respect of theory courses and lab involvement/records attendance in respect of Practical Courses.

Table-3: COMPONENTS WITH PERCENTAGE OF MARKS OF INTERNAL EVALUATION

	Component	Percentage of marks
Theory	Test paper	40%
	Assignment	20%,
	Seminar	20%
	Class room participation based on attendance	20%.
Practical	Record	60%
	lab involvement	40%

(if a fraction appears in internal marks, nearest whole number is to be taken)

For the test paper marks, at least one test paper should be conducted. If more test papers are conducted, the mark of the best one should be taken. To ensure transparency of the evaluation process, the internal assessment marks awarded to the students in each course in a semester shall be notified on the notice board at least one week before the commencement of external examination. There shall not be any chance for improvement for internal marks. The course teacher(s) shall maintain the academic record of each student registered for the course, which shall be forwarded to the University by the college Principal after obtaining the signature of both course teacher and Head of the Department.

Table-4: SPLIT UP OF MARKS FOR TEST PAPER

Range of Marks in test paper	Out of 8 (Maximum internal marks 20)	Out of 6 (Maximum internal marks 15)
Less than 35%	1	1
35% - 45%	2	2
45% - 55%	3	3
55% - 65%	4	4
65% - 85%	6	5
85% - 100%	8	6

Table-5: SPLIT UP OF MARKS FOR CLASS ROOM PARTICIPATION

Range of CRP	Out of 4 (Maximum internal marks 20)	Out of 3 (Maximum internal marks 15)
$50\% \leq \text{CRP} < 75\%$	1	1
$75\% \leq \text{CRP} < 85\%$	2	2
85 % and above	4	3

- **EXTERNAL EVALUATION**

External evaluation carries 80% of marks. All question papers shall be set by the University. The external question papers may be of uniform pattern with 80/60 marks (The pattern is given in the Annexure III). The courses with 2/3 credits will have an external examination of 2 hours duration with 60 marks and courses with 4/5 credits will have an external examination of 2.5 hours duration with 80 marks.

The external examination in theory courses is to be conducted by the University with question papers set by external experts. The evaluation of the answer scripts shall be done by examiners based on a well-defined scheme of valuation and answer keys shall be provided by the University.

The external examination in practical courses shall be conducted by two examiners – **one internal** and **an external**, the latter appointed by the University. The project evaluation with viva can be conducted either internal or external which may be decided by the Board of Studies concerned. After the external evaluation only marks are to be entered in the answer scripts. All other calculations including grading are done by the University.

- **REVALUATION**

In the new system of grading, revaluation is permissible. The prevailing rules of revaluation are applicable to CBCSSUG 2019. Students can apply for photocopies of answer scripts of external examinations. Applications for photocopies/scrutiny/revaluation should be submitted within 10 days of publication of results. The fee for this shall be as decided by the University.

- **EVALUATION OF AUDIT COURSES:**

The examination shall be conducted by the college itself from the Question Bank prepared by the University. The Question paper shall be of 100 marks of 3 hour duration. For SDE/Private students it may be of MCQ/ fill in the blank type questions or Online question paper may be introduced.

INDIRECT GRADING SYSTEM

Indirect grading System based on a 10-point scale is used to evaluate the performance of students.

Each course is evaluated by assigning marks with a letter grade (O, A+, A, B+, B, C, P, F, I or Ab) to that course by the method of indirect grading. An aggregate of P grade (after external and internal put together) is required in each course for a pass and also for awarding a degree (A minimum of 20% marks in external evaluation is needed for a pass in a course. But no separate pass minimum is needed for internal evaluation). No separate grade/mark for internal and

external will be displayed in the grade card; only an aggregate grade will be displayed. Also the aggregate marks of internal and external are not displayed in the grade card.

A student who fails to secure a minimum grade for a pass in a course is permitted to write the examination along with the next batch.

After the successful completion of a semester, Semester Grade Point Average (SGPA) of a student in that semester is calculated using the formula given below. For the successful completion of a semester, a student should pass all courses. However, a student is permitted to move to the next semester irrespective of SGPA obtained.

SGPA of the student in that semester is calculated using the formula

$$\text{SGPA} = \frac{\text{Sum of the credit points of all courses in a semester}}{\text{Total credits in that semester}}$$

The Cumulative Grade Point Average (CGPA) of the student is calculated at the end of a programme. The CGPA of a student determines the overall academic level of the student in a programme and is the criterion for ranking the students. CGPA can be calculated by the following formula.

$$\text{CGPA} = \frac{\text{Total credit points obtained in six semesters}}{\text{Total credits acquired (120)}}$$

SGPA and CGPA shall be rounded off to three decimal places. CGPA determines the broad academic level of the student in a programme and is the index for ranking students (in terms of grade points). An overall letter grade (cumulative grade) for the entire programme shall be awarded to a student depending on her/his CGPA

GRADE CARD

The University shall issue to the students grade/marks card (by online) on completion of each semester, which shall contain the following information:

Name of University, Name of College, Title of UG Programme, Semester concerned, Name and Register Number of student, Code number, Title and Credits of each Course opted in the semester, Letter grade in each course in the semester, The total credits, total credit points and SGPA in the Semester (corrected to three decimal places)

The final Grade card issued at the end of the final semester shall contain the details of all courses taken during the entire programme including those taken over and above the prescribed

minimum credits for obtaining the degree. The final grade card shall show CGPA (corrected to three decimal places), percentage of marks (corrected to two decimal places) and the overall letter grade of a student for the entire programme. The final grade card shall also include the CGPA and percentage of marks of common courses, core courses, complementary courses and open courses separately. This is to be done in a 10- point indirect scale. The final Grade card also contains the list of Audit courses passed and the details of Extra credits.

METHOD OF INDIRECT GRADING

Evaluation (both internal and external) is carried out using Mark system .The Grade on the basis of total internal and external marks will be indicated for each course, for each semester and for the entire programme. Indirect Grading System in 10 -point scale is as below:

Table-6: TEN POINT INDIRECT GRADING SYSTEM

Percentage of Marks (Both Internal & External put together)	Grade	Interpretation	Grade point Average (G)	Range of grade points	Class
95 and above	O	Outstanding	10	9.5 - 10	First Class with Distinction
85 to below 95	A+	Excellent	9	8.5 - 9.49	
75 to below 85	A	Very good	8	7.5 - 8.49	
65 to below 75	B+	Good	7	6.5 - 7.49	First Class
55 to below 65	B	Satisfactory	6	5.5 - 6.49	
45 to below 55	C	Average	5	4.5 -5.49	Second Class
35 to below 45	P	Pass	4	3.5 -4.49	Third Class
Below 35	F	Failure	0	0	Fail
Incomplete	I	Incomplete	0	0	Fail
Absent	Ab	Absent	0	0	Fail

GUIDELINES FOR THE EVALUATION OF PROJECTS

The evaluation of the project work shall be conducted at the end of the sixth semester, along with the practical examination. Evaluation of the Project Report shall be done under Mark System. The internal to external components is to be taken in the ratio 1:4. The total marks earmarked for the project work is 75 (Internal 15 & External 60). The marks shall be awarded on the basis of the originality, structural and content wise perfection of the work. The evaluation of the project will be done at two stages:

a) **Internal Assessment** (assessed by Supervising teachers)

Internal Assessment should be completed 2 weeks before the last working day of VI Semester. Internal Assessment marks should be published in the Department. Submission of the Project Report and presence of the student for viva are compulsory for internal evaluation. Internal assessment of the project will be based on its content, method of presentation, final conclusion and orientation to research aptitude.

b) **External evaluation** (assessed by External examiner appointed by the University)

Grade for the project will be awarded to candidates, combining the internal and external marks. Project evaluation will be done along with practical examinations. External Examiners will be appointed by the University from the list of VI Semester Board of Examiners in consultation with the Chairperson of the Board. The Chairman of the VI semester examination should form and coordinate the evaluation teams and their work. The Chairman Board of Examinations, may at his discretion, on urgent requirements, make certain exception in the guidelines for the smooth conduct of the evaluation of project. No marks shall be awarded to a candidate if she/ he fails to submit the Project Report for external evaluation. Project presentations (10 to 15 minutes) should be supported with electronic presentation methods. (PowerPoint / any other similar presentation making program can be used).

Table-7: ASSESSMENT OF DIFFERENT COMPONENTS OF PROJECT

Components		Percentage of marks
Internal (20%)	External (80%)	
Originality	Relevance of the Topic, Statement of Objectives	20
Methodology	Reference/ Bibliography, Presentation, quality of Analysis/ Use of Statistical tools.	20
Scheme/ Organization of Report	Findings and recommendations	30
Viva – Voce	Viva – Voce	30

The student should get a minimum P Grade in aggregate of External and Internal. There shall be no improvement chance for the Marks obtained in the Project Report. In the extent of student failing to obtain a minimum of Pass Grade, the project work may be re-done and a new internal mark may be submitted by the Parent Department. External examination may be conducted along with the subsequent batch.

PRACTICAL RECORD

The entire experiments mentioned in the practical syllabus are expected to be done. A certified record book is an evidence of the practical works done by the candidate during the course. Therefore, it must be treated seriously and valued properly. Moreover, the genuine work should be appropriately rewarded. The total marks set apart for the record of the programme are 40 i.e., 15 marks for the record of practical papers I & II, 10 marks for paper III.

External evaluation of Record - Parameters

- a Content should cover the practical works mentioned in the syllabus for recording.
- b Neatness and scientific accuracy

SUBMISSIONS

Submissions are mandatory for each practical paper and it carries 55 marks altogether. The items to be submitted as part of each practical paper for valuation are appended below.

Practical paper – I

Students are expected to submit any five properly identified specimens belonging to Pathology (either the diseases mentioned in the syllabus or any locally available common diseases of crop plants can be used), duly certified by the Head of the department.

Practical Paper – II

Every student has to submit a photo album containing images of properly identified types of fruits and inflorescence and plants at least one each from all families mentioned in the syllabus, with specifications on systematic position, location, date, name of the student etc. and tour report duly certified by the Head of the department. Individuality should be strictly maintained while submitting the photo album.

Practical Paper –III

Every student has to submit duly certified detailed reports of visit to (i) Plant breeding station (ii) Research station with reference to Biotechnology/Molecular Biology.

Elective paper Record

There is no practical examination for elective papers; the practical works mentioned in the syllabus have to be done, recorded, certified and to be submitted on the day of Practical examination of Paper III.

Study Tour Report

Every student has to submit a report of study tour conducted as per the conditions mentioned in the syllabus of Systematics under Core Course 6, duly certified by HoD.

Table-8 : MARK DISTRIBUTION OF SUBMISSIONS

Submission	Items	Marks
Pract. P-I	Pathology herbarium sheets	5
Pract. P-II	Photo album of Morphology and Systematics	10
Pract. P-III	Report of visit to (i) Plant breeding station (ii) Research station (Biotech/ Molecular Biol. Lab)	5
	Record of Elective Paper	10
Total for submissions		30
Study tour report		5

QUESTION PAPERS

QUESTION PAPER TYPE 1

Scheme of Examinations:

The external QP with **80** marks and internal examination is of **20** marks. Duration of each external examination is **2.5** Hrs. The pattern of External Examination is as given below. The students can answer all the questions in Sections A&B. But there shall be Ceiling in each section.

Section A: Short answer type carries 2 marks each - 15 questions Ceiling - 25

Section B: Paragraph/ Problem type carries 5 marks each - 8 questions Ceiling - 35

Section C: Essay type carries 10 marks (2 out of 4) 2x10=20

QUESTION PAPER TYPE 2

Scheme of Examinations:

The external QP with **60** marks and internal examination is of **15** marks. Duration of each external examination is **2** Hrs. The pattern of External Examination is as given below. The students can answer all the questions in Sections A & B. But there shall be Ceiling in each section.

Section A: Short answer type carries 2 marks each - 12 questions Ceiling - 20

Section B: Paragraph/ Problem type carries 5 marks each - 7 questions Ceiling - 30

Section C: Essay type carries 10 marks (1 out of 2) 1x10=10

FIRST SEMESTER B. Sc. BOTANY DEGREE PROGRAMME
CORE COURSE 1
ANGIOSPERM ANATOMY, REPRODUCTIVE BOTANY & PALYNOLOGY
Code: BOT 1 B 01 T

COURSE OUTCOMES (COs)

By the end of the course, students are expected to:

1. Demonstrate the ability to differentiate plant organs by observing anatomical features.
2. Understand the non-living inclusions of plants and their significance
3. Differentiate tissues and their functions.
4. Illustrate primary and secondary (normal and anomalous) structures of plant organs.
5. Explain various developmental details of angiosperms
6. Realize the significance and applications of palynology.

DISTRIBUTION OF TEACHING HOURS (18 hrs/Semester = 1hr/week)

Sl no	Subject	Theory	Practical	Total
1	Angiosperm Anatomy	22	27	49
2	Reproductive Botany & Palynology	14	9	23
Total		36	36	72

QUESTION PAPER PATTERN & SUBJECT WISE DISTRIBUTION OF MARKS

Type of questions	Plant Anatomy	Reprod. Bot. & Palynology	Total marks
2 marks (total 12)	8	4	Ceiling 20
5 marks (total 7)	4	3	Ceiling 30
10 marks (total 2)	1	1	1x10 = 10
TOTAL			60

ANGIOSPERM ANATOMY

Module - I. (5 hrs)

1. Cell Wall - Structure and development; Growth of Cell wall; cell wall materials
2. Non-living inclusions
 - a. Reserve food materials - carbohydrates, proteins, fats & oils. Carbohydrates - sugars & starch; Starch grains -structure, types with examples; Proteins - Aleurone grains with examples; Fats & oils examples.
 - b. Secretory materials
 - c. Waste materials - Nitrogenous – alkaloids, Non-nitrogenous- gums, resins, tannins, organic acids, essential oils; Mineral crystals - Calcium oxalate, Drusses, Raphides, Calcium carbonate –cystoliths with examples

Module-II (5 hrs)

1. Tissues :- Definition –Types
 - a. Meristematic tissues - classification.

- i. Theories on apical organization - Apical cell theory, Histogen theory, Tunica corpus theory
 - ii. Organization of shoot apex and differentiation of tissues-(protoderm, procambium and ground meristem).
 - iii. Organization of root apex in dicots- common types with three sets of initials- in monocots – Maize type with four sets of initials
- b. Mature tissues- definition classification- simple complex and secretory**
- i. Simple tissues – structure occurrence and function.
 - ii. Complex tissues - Xylem & Phloem -structure, origin and function
 - iii. Secretory tissues - glands, glandular hairs, nectaries, hydathodes, schizogenous and lysigenous ducts, resin ducts, laticifers –articulated and non-articulated

Module – III (4 hrs)

1. Vascular bundles - Origin and types - conjoint, collateral, bi-collateral, open closed, radial, concentric - amphicribal and amphivasal.
2. Primary structure of root, stem & leaf (brief account only)

Module- IV (8 hrs)

1. Normal secondary growth in Dicot stem and Dicot root. Formation of vascular cambial ring - structure and activity of cambium – storied and non-storied, fusiform and ray initials; Formation of secondary wood, secondary phloem, vascular rays, growth ring, heart wood, sapwood.
2. Extra stelar Secondary thickening in stem and root - Periderm formation. Structure - phellogen, phellem, phelloderm, bark, lenticels - structure & function.
5. Anomalous secondary growth - general account with special reference to the anomaly in Dicot stem – *Boerhaavia*, *Bignonia* and Monocot stem- *Draceana*

PRACTICALS (ANGIOSPERM ANATOMY)

1. Identification at sight the different types of tissues and vascular bundles.
 2. Primary structure of stem, root and leaf of Dicots and Monocots
 - a. Dicot stem – normal –Eupatorium, bi-collateral – *Cephalandra*
 - b. Dicot root – Pea
 - c. Monocot stem - Bamboo
 - d. Monocot root – *Musa*
 - e. Dicot leaf – *Ixora*
 - f. Monocot leaf – Grass
3. Secondary structure of Dicot stem and root – *Vernonia*
4. Anomalous secondary thickening in *Boerhaavia*, *Bignonia* and *Draceana*

REPRODUCTIVE BOTANY & PALYNOLOGY

1. Introduction to angiosperm embryology with special reference to Indian embryologists
2. Microsporogenesis - Structure and function of wall layers - Development of male gametophyte - dehiscence of anther
3. Megasporogenesis - development of female gametophyte, embryo sac- development and types- monosporic : Polygonum type, bisporic : Allium type, tetrasporic : Adoxa type.
4. Pollination fertilization barriers of fertilization germination of pollen grains, double fertilization.
5. Structure of embryo dicot (*Cypselia*), monocot (*Sagittaria*) and endosperm types
6. Palynology - Pollen morphology- Structure of pollen wall, Shape of pollen grains, Apertural morphoforms, Exine ornamentation; Pollen allergy, Economic and taxonomic importance

PRACTICALS (REPRODUCTIVE BOTANY & PALYNOLOGY)

1. *Datura* anther T.S. (mature)
2. Types of ovules: Orthotropous, Anatropous and Campylotropous (Slides only, drawing not required)
3. Dicot and monocot embryo of Angiosperms (Slides only, drawing not required)
4. Pollen morphology of *Hibiscus*, and pollinia of *Cryptostegia/ Calotropis* by acetolytic method
5. Viability test for pollen
 - a. *In vitro* germination using sugar solution. (cavity slide method)
 - b. Tetrazolium test
 - c. Acetocarmine test (Acetocarmine & Glycerine 1:1)

SECOND SEMESTER B. Sc. BOTANY DEGREE PROGRAMME
CORE COURSE- 2
MICROBIOLOGY, MYCOLOGY, LICHENOLOGY AND PLANT PATHOLOGY
Code: BOT 2 B 02 T

COURSE OUTCOMES (COs)

By the end of the course, students are expected to:

1. Understand basics of microbial life and their economic importance.
2. Develop general awareness on the diversity of microbes
3. Develop general awareness on the diversity of fungi and lichens
4. Analyze the ecological role played by fungi and lichens
5. Identify plant diseases and find out control measures
6. Realize the significance of plant diseases as far as crop production is concerned.

DISTRIBUTION OF TEACHING HOURS (18 hrs/Semester = 1hr/week)

Sl no	Subject	Theory	Practical	Total
1	Microbiology	9	9	18
2	Mycology	13	14	27
3	Lichenology	5	4	9
4	Plant Pathology	9	9	18
Total		36	36	72

QUESTION PAPER PATTERN & SUBJECT WISE DISTRIBUTION OF MARKS

Type of questions	Microbiology	Mycology	Lichenology	Pathology	Total
2 marks (total 12)	3	4	2	3	Ceiling 20
5 marks (total 7)	3	2	1	1	Ceiling 30
10 marks (total 2)	2				1x10 = 10
TOTAL					60

MICROBIOLOGY

1. Introduction to Microbiology
2. Bacteria –Classification based on morphology and staining, Ultra structure of bacteria; Bacterial growth, Nutrition, Reproduction.
3. Viruses – Classification, architecture and multiplication, Bacteriophages, TMV, retroviruses- HIV, Virioids, Prions.
4. Microbial ecology – Rhizosphere and Phyllosphere.
5. Industrial microbiology –alcohol, acids, milk products single cell proteins
6. Economic importance of bacteria, Vaccines: importance, mechanism.

PRACTICALS (MICROBIOLOGY)

1. Simple staining
2. Gram staining – Curd, root-nodules

- Culture and isolation of bacteria using nutrient agar medium (demonstration only)

REFERENCES (MICROBIOLOGY)

MYCOLOGY

- Introduction – General characters and phylogeny
- A general outline on classification – Ainsworth and Bisby (1983)
- Mastigomycotina : General characteristics, occurrence, reproduction, and life cycle –
Type: *Pythium*
- Zygomycotina: General characteristics, occurrence, reproduction, and life cycle –
Type: *Mucor*
- Ascomycotina: General characteristics, occurrence, reproduction and life cycle
Type: *Peziza*.
- Basidiomycotina: General characteristics, occurrence, reproduction and lifecycle –
Types: *Puccinia, Agaricus*
- Deuteromycotina: General characteristics, occurrence reproduction and life cycle-
Type: *Cercospora*.
- Economic importance of fungi: Medicinal, industrial, Agricultural, Food, Genetic Studies and fungal toxins.

PRACTICALS (MYCOLOGY)

- Micropreparation – Lactophenol cotton blue – Slides of the above mentioned types.

5. Sethi, I.K. and Walia, S.K. (2011) Text book of Fungi and Their Allies, Macmillan Publishers India Ltd.

LICHENOLOGY

1. Introduction: Type of Interaction between the components symbiosis – mutualism.
2. Classification, growth forms, Structure, Reproduction, Economic importance. Type: *Usnea*
5. Toxicology, Lichens as food, Bioremediation, Ecological indicators, Pollution indicators, Lichen in Soil formation and pioneers of Xerosere.

PRACTICALS (LICHENOLOGY)

1. Identification of different forms of Lichens.
2. *Usnea* : structure of thallus, fruiting body

REFERENCES (LICHENOLOGY)

PLANT PATHOLOGY

1. Introduction – Concepts of plant disease, pathogen, causative agents, symptoms
3. Symptoms of diseases: spots, blights, wilts, rots, galls, canker, gummosis, necrosis, chlorosis, smut, rust, damping off.
4. Control measures: Chemical, biological and genetic methods, quarantine measures.
5. Brief study of Plant diseases in South India (Name of disease, pathogen, symptom and control measures need to be studied)
 1. Citrus Canker
 2. Mahali disease of arecanut,
 3. Blast of paddy,
 4. Quick wilt of pepper,
 5. Mosaic disease of tapioca,
 6. Bunchy top of banana.
 7. Grey leaf spot of coconut.

PRACTICALS (PLANT PATHOLOGY)

Identification of the disease, pathogen, symptoms and control measures of the following:
(drawing not required)

- a. Citrus canker
- b. Mahali disease
- c. Tapioca mosaic disease
- d. Blast of Paddy
- e. Quick wilt of pepper
- f. Bunchy top of Banana
- g. Grey leaf spot of coconut

SUBMISSION (PLANT PATHOLOGY)

Students are expected to submit five properly identified Pathology specimens during the Practical Examination of Paper-I held at the end of Fourth semester. Diseases mentioned in the syllabus or any locally available common diseases of crop plants can be selected for submission.

REFERENCES (PLANT PATHOLOGY)

THRD SEMESTER B. Sc. BOTANY DEGREE PROGRAMME
CORE COURSE – 3
PHYCOLOGY, BRYOLOGY AND PTERIDOLOGY
Code: BOT 3 B 03 T

COURSE OUTCOMES (COs)

By the end of the course, students are expected to:

1. Appreciate the diversity and evolutionary significance of lower plant groups
2. Classify algae, bryophytes and pteridophytes
3. Understand the economic and ecological importance of lower plant groups

DISTRIBUTION OF TEACHING HOURS (18 hrs/Semester = 1hr/week)

Sl no	Subject	Theory	Practical	Total
1	Phycology	23	9	32
2	Bryology	9	9	18
3	Pteridology	22	18	40
Total		54	36	90

QUESTION PAPER PATTERN & SUBJECT WISE DISTRIBUTION OF MARKS

Type of questions	Phycology	Bryology	Pteridology	Total

5 marks (total 7)	2	2	3	Ceiling 30
10 marks (total 2)	2			1x10 = 10
TOTAL				60

PHYCOLOGY

1. Introduction, Range of thallus structure, pigments, reproduction
2. Life cycle, Classification of Algae proposed by FE Fritsch (1935).
3. General Features: Occurrence, thallus structure, reproduction, and life cycle of the types given below:
 - a. Cyanophyceae : *Nosoc*
 - b. Chlorophyceae: *Chlorella, Volvox, Oedogonium, Chara*.
 - c. Xanthophyceae: *Vaucheria*.
 - d. Bacillariophyceae: *Pinnularia*.
 - e. Phaeophyceae: *Sargassum*.
 - f. Rhodophyceae: *Polysiphonia*.
4. Economic Importance: Algae as food, fodder, green manure, bio-fuels, pollution indicators, research tools, medicinal uses of algae, Commercial Products – carrageenin, agar-agar, alginates, diatomaceous earth. Harmful effects – Water bloom, eutrophication, neurotoxins, parasitic algae.

PRACTICALS (PHYCOLOGY)

1. Identification of the vegetative and reproductive structures of the types studied.

BRYOLOGY

1. Introduction, general characters and classification by Stotler & Stotler (2008)
2. Study the distribution, morphology, anatomy, reproduction, life cycle and affinities of the following types (Developmental details are not required)
 - a. *Riccia* (Marchantiophyta)
 - b. *Anthoceros* (Anthocerotophyta)
 - c. *Funaria* (Bryophyta)
3. Economic importance of Bryophytes
4. Fossil Bryophytes

PRACTICALS (BRYOLOGY)

1. *Riccia* – Habit, Anatomy of thallus, V.S. of thallus through antheridium, archegonium and sporophyte.
2. *Anthoceros*- Habit, Anatomy of thallus. V.S. of thallus through antheridium, archegonium and sporophyte.
3. *Bryum* (due to non-availability of *Funaria* except at higher altitudes) - Habit, structure of antheridial cluster, archegonial cluster, L.S. of sporophyte.

PTERIDOLOGY

1. Introduction, general characters and classification (Smith *et al.*, 2008 – brief outline only)
2. Study the distribution, morphology, anatomy, reproduction, life cycle and affinities of the following types (Developmental details are not required)
 - a. *Selaginella* (Lycopsida).
 - b. *Psilotum* (Psilotopsida)
 - c. *Equisetum* (Equisetopsida)
 - d. *Pteris* (Polypodiopsida)
3. Apogamy and apospory in Pteridophytes; Stellar evolution in Pteridophytes; Heterospory and seed habit; Affinities of Pteridophytes; Economic importance of Pteridophytes

PRACTICALS (PTERIDOLOGY)

1. *Selaginella* – habit, T.S. of stem, T.S. of rhizophore, L.S. of Strobilus
2. *Psilotum*- habit, T.S. of stem, C.S. of synangium (Slides only)
3. *Equisetum* - habit, T.S. of stem, L.S. of strobilus
4. *Pteris* - habit, T.S. of stem, C.S. of sporophyll

FOURTH SEMESTER B. Sc. BOTANY DEGREE PROGRAMME
CORE COURSE- 4
METHODOLOGY AND PERSPECTIVES IN PLANT SCIENCE
Code: BOT 4 B 04 T

COURSE OUTCOMES (COs)

By the end of the course, students are expected to:

1. Develop scientific temper
2. Undertake scientific projects and prepare project reports
3. Analyze statistical data and derive conclusions
4. Prepare permanent slides, applying the histochemical techniques

DISTRIBUTION OF TEACHING HOURS (18 hrs/Semester = 1hr/week)

Sl no	Subject	Theory	Practical	Total
1	Scientific Methods	9	9	18
2	Biostatistics	15	9	24
3	Biophysics	15	9	24
4	Microtechnique	15	9	24
Total		54	36	90

QUESTION PAPER PATTERN & SUBJECT WISE DISTRIBUTION OF MARKS

Type of questions	Methodology	Biostatistics	Biophysics	Microtech.	Total
2 marks (total 12)	2	3	4	3	Ceiling 20
5 marks (total 7)	1	2	2	2	Ceiling 30
10 marks (total 2)	2				1x10 = 10
TOTAL					60

SCIENTIFIC METHODS

Module – I

1. Steps in scientific methods
2. Structure of Research report, Style of citation, Biological journals, Impact Factor, Sources of reference: Google Scholar, Sodh Ganga, NCBI, Inflibnet.
3. Latest methods of presentation.

PRACICALS (SCIENTIFIC METHODS)

1. Bibliography searches using online tools
2. Familiarizing latest methods of ICT based presentations

REFERENCES (SCIENTIFIC METHODS)

1. P.G. Hewitt, J.A. Suchocki ISBN-10 0805 390385, Conceptual integrated science ISBN-139780805390384.

2. R.G. Newton (1997) The truth of Science Physical theories and reality. Viva Books, New Delhi, II Edition.

BIOSTATISTICS

Module – I (7 hrs)

1. Introduction to Biostatistics: Importance and limitations of Biostatistics
2. Observations: direct and indirect observations, controlled and uncontrolled observations, human and machine observations.
3. Data collection: Introduction; Sampling; random and non-random.
4. Representation of data; Tables, Bar diagram, Pie diagram, Histogram, Frequency polygon, Ogive, Frequency curve [both manual and using computer].
5. Interpretation and deduction of data, significance of statistical tools in data interpretation, errors and inaccuracies.

Module II: (8 hrs)

1. Measures of central tendency: mean, median and mode
2. Measures of dispersion: Range, Mean Deviation, Variance, Standard Deviation, Coefficient of variation.
3. Correlation and regression (brief account).
6. Test of hypothesis: Null hypothesis, Alternate hypothesis Chi-square test.

PRACTICALS (BIOSTATISTICS)

1. Work out problems under all types mentioned in the syllabus. One example each from all categories should be recorded.
2. Familiarize the technique of data representation (bar diagram, histogram, pie-diagram and frequency curve (both manual and using computer).

REFERENCES (BIOSTATISTICS)

7. Zar, J.H. (2012) Biostatistical Analysis. Pearson Publication. U.S.A. 4th edition

BIOPHYSICS

Module 1

1. Solutions: representing concentrations: Molarity, Normality, Percentage and ppm.
2. Acids and bases, buffers and pH, measurement of pH. Preparation and use of buffers in biological studies.
3. Photometry: Colorimetry and Spectrophotometry, principle, working and uses.

4. Centrifugation: Principle, types of centrifuges and their applications
5. Chromatography - Principle and types: Adsorption chromatography, Partition chromatography, Ion exchange chromatography, Molecular sieving.

PRACTICALS (BIOPHYSICS)

1. Preparation of solutions of known concentrations using pure samples and stock solutions
2. Preparation of buffers
3. Measurement of pH using pH meter.
4. Demonstration of the working of different kinds of centrifuges

REFERENCES (BIOPHYSICS)

1. Keith Wilson and John Walker (2008). Principles and techniques of Biochemistry and Molecular Biology 6th edition. Cambridge University Press.

6. Slayter. E.M. (1970) Optical methods in Biology. Wiley Intersciences.
7. Wong. C.H. (1965) Radiation Tracer Methodology in Biophysical Sciences. Prentice Hall.

MICROTECHNIQUE

Module – 1

1. Principles of microscopy and parts of microscopes
2. Types of microscopes: Light microscope, Compound microscope, Phase contrast microscope, Fluorescent microscope, Electron microscope: Transmission Electron Microscopy (TEM) and Scanning Electron Microscopy (SEM)
5. Micrometry– Stage micrometer, Ocular micrometer, Calibration and working.
6. Preparation of illustrations using digital camera and photomicrography

Module - II

1. General account of Killing and fixing, agents used for killing and fixing. Common fixatives – Formalin – Acetic – Alcohol, Carnoy's fluids I & II, Chromic acid – Acetic acid – Formation (CRAF)
2. Dehydration and infiltration – general account of dehydration (Ethanol, Isopropyl alcohol, Acetone, Glycerine). Ethanol – Xylene series and Tertiary Butyl Alcohol Series.
3. Infiltration – paraffin wax method, embedding.
4. Free hand sectioning; Microtome (Rotary and sledge) serial sectioning and its significance.
5. Staining – General account, Classification: natural dyes, coal tar dyes. Double staining, Vital staining

6. Mounting.
7. A brief account on whole mounting, maceration and smears

PRACTICALS (MICROTECHNIQUE)

1. Parts of microscope and its operation (drawing not required)
2. Free hand sectioning of stem, leaves, Staining and mounting.
3. Measurement of pollen size using micrometer.
4. Demonstration of dehydration, infiltration, embedding and microtoming.

REFERENCES (MICROTECHNIQUE)

FIFTH SEMESTER B. Sc. BOTANY DEGREE PROGRAMME
CORE COURSE -6
GYMNOSPERMS, PALAEOBOTANY, PHYTOGEOGRAPHY, EVOLUTION
Code: BOT 5 B 06 T

COURSE OUTCOMES (COs)

By the end of the course, students are expected to:

1. Understand the role of gymnosperms as a connecting link between pteridophytes and angiosperms
2. Appreciates the process of organic evolution.
3. Realize the importance of fossil study
4. Recognize the phytogeographic zones of India.

DISTRIBUTION OF TEACHING HOURS (18 hrs/Semester = 1hr/week)

Sl no	Subject	Theory	Practical	Total
1	Gymnosperms	9	18	27
2	Palaeobotany	9	9	18
3	Phytogeography	18	9	27
4	Evolution	18	-	18
Total		54	36	90

QUESTION PAPER PATTERN & SUBJECT WISE DISTRIBUTION OF MARKS

Type of questions	Gymno.	Palaeobot.	Phytogeo.	Evolution	Total
2 marks (total 12)	4	2	3	3	Ceiling 20
5 marks (total 7)	2	1	2	2	Ceiling 30
10 marks (total 2)	2				1x10 = 10
TOTAL					60

GYMNOSPERMS

1. Introduction, General characters and classification of Gymnosperms (Sporne, 1965)
2. Distribution, morphology, anatomy, reproduction, life cycle and affinities of the following types (Developmental details not required): *Cycas*, *Pinus* and *Gnetum*
3. Evolutionary trends in Gymnosperms; Affinities of Gymnosperms with Pteridophytes and Angiosperms
4. Economic importance of Gymnosperms.

PRACTICALS (GYMNOSPERMS)

1. *Cycas*- Habit, coralloid root, T.S. of coralloid root, T.S. of leaflet, T.S. of rachis, male cone and L.S. of male cone, microsporophyll, megasporophyll, T.S. of microsporophyll, L.S. of ovule and seed.
2. *Pinus*- branch of unlimited growth, spur shoot, T.S. of stem and needle, male cone and

female cone, L.S. of male cone and female cone, seed.

3. *Gnetum*- Habit, stem T.S., leaf T.S., male and female cones, L.S. of ovule, seed.

REFERENCES (GYMNOSPERMS)

1. Chamberlain C.J. (1935) Gymnosperms –Structure and Evolution, Chicago University Press.

4. Sreevastava H.N. (1980) A Text Book of Gymnosperms. S. Chand and Co. Ltd., New Delhi.
5. Vasishta P.C. (1980) Gymnosperms. S. Chand and Co., Ltd., New Delhi.

PALAEOBOTANY

1. Introduction and objectives
2. Fossil formation and types of fossils
3. Geological time scale- sequence of plants in geological time
4. Fossil Pteridophytes- *Rhynia*, *Lepidodendron* and *Calamites*
5. Fossil gymnosperms- *Williamsonia*
6. Important Indian Paleobotanical Institutes.
7. Indian Palaeobotanists: Birbal Sahni and Savithri Sahni
8. Applied aspects of Palaeobotany- exploration of fossil fuels

PRACTICALS (PALAEOBOTANY)

- 1 Fossil Pteridophytes - *Rhynia* stem, *Lepidodendron*, and *Calamites*
 - 2 Fossil gymnosperms- *Williamsonia*
- (Drawings may be replaced with photos in the record)

REFERENCES (PALAEOBOTANY)

7. Steward A.C. (1935) Fossil Plants Vol. I to IV. Watson J. An introduction to study of fossil plants. Adams and Charles Black Ltd. London.

PHYTOGEOGRAPHY

1. Definition, concept, scope and significance of phytogeography.
2. Patterns of plant distribution - continuous distribution and discontinuous distribution, vicarism, migration and extinction

3. Continental drift -Evidences and impact.
4. Glaciation: Causes and consequences.
5. Theory of land bridges.
6. Endemic distribution, theories on endemism, age and area hypothesis.
7. Phytogeographical zones (phytochoria) of India.

PRACTICALS (PHYTOGEOGRAPHY)

- 1 Mark the phytogeographic zones of India.

REFERENCES (PHYTOGEOGRAPHY)

2. Armen Takhtajan, (1986) Floristic Regions of the World. (translated by T.J. Crovello & A. Cronquist). University of California Press, Berkeley.
3. P. D. Sharma, (2009) Ecology and Environment, Rastogi Publications, Meerut

EVOLUTION

1. Origin of earth, Introduction; Evidences of organic evolution from Morphology, Anatomy, Embryology, Palynology, Genetics and Molecular Biology.
2. Condensation and Polymerisation; Protoids and Prions – Oparin’s concept; Miller’s experiment.
3. Evolution of prokaryotic and eukaryotic cells. Archaeobacteria – Early fossilized cells.
4. Theories on origin and evolution of species: Darwinism; Neo-Darwinism and its objection; Arguments and support for Darwinism, Modern concept of evolution
5. Genetic Constancy and Creation of Variability: Cell divisions and genetic constancy; – Genetic variability by recombination, Chromosomal variations, Gene mutations, Selection and genetic drift.
6. Speciation: Isolating mechanism – Modes of speciation – sympatric and allopatric .

REFERENCES (EVOLUTION)

FIFTH SEMESTER B. Sc. BOTANY DEGREE PROGRAMME
CORE COURSE-7
ANGIOSPERM MORPHOLOGY & SYSTEMATICS
Code: BOT 5 B 07 T

COURSE OUTCOMES (COs)

By the end of the course, students are expected to:

1. Appreciate the diverse morphology of angiosperms.
2. Identify and classify plants based on taxonomic principles
3. Make scientific illustrations of vegetative and reproductive structures of plants
4. Develop the skill of scientific imaging of plants
5. Realize the importance of field study

DISTRIBUTION OF TEACHING HOURS (18 hrs/Semester = 1hr/week)

Sl no	Subject	Theory	Practical	Total
1	Angiosperm Morphology	14	9	23
2	Systematics	40	27	67
Total		54	36	90

QUESTION PAPER PATTERN & SUBJECT WISE DISTRIBUTION OF MARKS

Type of questions	Angio. Morphology	Systematics	Total
2 marks (total 12)	4	8	Ceiling 20
5 marks (total 7)	2	5	Ceiling 30
10 marks (total 2)	2		1x10 = 10
TOTAL			60

ANGIOSPEM MORPHOLOGY

1. Technical description of a flowering plant (brief)
2. Inflorescence: racemose, cymose and specialised (cyathium, hypanthodium, coenanthium verticillaster, thyrus)
3. Flower: Flower as a modified shoot - detailed structure of flowers – floral parts –their arrangement, relative position, cohesion and adhesion - symmetry of flowers
4. Fruits– simple, aggregate and multiple with examples; Seed structure - dicot and monocot - albuminous and exalbuminous, aril, caruncle; Dispersal of fruits and seeds - types and adaptations.

PRACTICALS (ANGIOSPEM MORPHOLOGY)

1. Identify the types of inflorescence and fruits mentioned in the syllabus.
2. All the types mentioned under inflorescence and fruits must be represented in the photo album. (All drawings in records are replaced by photo album submission).

REFERENCES (ANGIOSPEM MORPHOLOGY)

1. Gangulee, H.C., J.S. Das & C. Dutta. (1982) College Botany (5th Ed.) New Central Book Agency, Calcutta.
2. George, H.M. Lawrence. (1951) Introduction to Plant Taxonomy. Mac Millan comp. Ltd., New York.
3. Simpson, M. G. (2006) Plant Systematics. Elsevier Academic Press, London
4. Sporne, K.R. (1974) Morphology of Angiosperms. Hutchinson University Press London

SYSTEMATICS**Module-I**

1. Components of systematics: identification, description nomenclature and classification; objectives and importance of systematics
2. Systems of classification: Artificial – Linnaeus; Natural – Bentham and Hooker; Phylogenetic – Hutchinson; Angiosperm Phylogeny Group system

Module - II

1. Detailed study (systematic position, distribution, common members, diagnostic features, description from habit to fruit and economic importance of the following families. Annonaceae, Malvaceae, Meliaceae, Fabaceae with sub families, Myrtaceae, Cucurbitaceae, Rubiaceae, Asteraceae, Apocynaceae, Solanaceae, Acanthaceae, Lamiaceae, Euphorbiaceae, Liliaceae, Orchidaceae and Poaceae.

Module- III

1. Taxonomic structure – Hierarchy; Concepts of taxa: Species – Biological, Phenetic and Phylogenetic; Genus; Family.
2. Taxonomic character – concept, primitive and advanced characters, sources, comparative morphology, vegetative, reproductive, Macro and micromorphology, modern trends in taxonomy, cytotaxonomy, chemotaxonomy, numerical taxonomy, molecular taxonomy and phylogenetics.
3. Contributions of eminent Taxonomists viz Hendrich van Rheed, William Roxburg, Robert Wight, J. S. Gamble and EK Janaki Ammal.

Module - IV

1. Plant Nomenclature – Limitations of common name, ICN - Principles (introduction only); Typification (holotype, isotype, syntype paratype and lectotype); Priority – merits and demerits; Effective and valid publication; Author citation.
2. Plant identification – Keys; indented and bracketed, construction and applications.
3. Taxonomic information resources – Herbarium preparation and maintenance, Herbarium types: International- Kew (K); National-Central national herbarium (CAL), MH Coimbatore, Virtual herbarium, Botanic Gardens: RBG, Kew, IGB, Kolkotta; TBGRI and Malabar Botanical Garden and Institute for Plant Sciences, Kozhikode.

4. Taxonomic literature- Floras, e-Flora, Monographs, Revisions, Journals and online resources & Databases.

PRACTICALS (SYSEMATICS)

1. Students are expected to work out at least two members of each family mentioned in the syllabus and make suitable diagrams (floral diagram, floral formula not needed). Describe them in technical terms and identify up to species using the flora. Orchidaceae may be excluded from practical examination scheme.
2. Students shall be able to prepare artificial key to segregate any five given plants. This must be recorded.
3. Familiarization of herbarium techniques (Demonstration only).
4. Mounting of a properly dried and pressed specimen of any wild plant from any one of the families mentioned in the syllabus, with proper herbarium label (to be submitted in the record book).
5. Every student shall submit images of plants, at least one from each family mentioned in the syllabus, duly certified by HoD, at the time of examination. The images of plants should be properly identified and they should carry details like systematic position, GPS location, date, name and reg. no. of the student etc. Separate images clearly showing habitat, habit, inflorescence type, single flower, floral parts etc. of each plant should be represented. The images can be submitted along with the photo album containing images of inflorescence and fruits mentioned under morphology. Individuality should be strictly maintained while preparing the photo album.
6. It is compulsory that every student has to undertake field study trips of 3 -5 days to study vegetation of ecologically different areas, under the guidance of teachers. Visits to standard Herbaria, organizations/ institutes involved in exploring plant resources, Botanical museums etc. may be conducted as part of study tour. Local habitats like sacred groves, rice fields, wetlands, forests, grasslands etc. also can be selected for field trips. Avoid visit to tourist places. Submit a field visit report countersigned by the Head of the department during the practical examination.
7. If a student fails to undergo the study tour he /she may not be permitted to attend the examination.

FIFTH SEMESTER B. Sc. BOTANY DEGREE PROGRAMME
CORE COURSE- 8
TISSUE CULTURE, HORTICULTURE, ECONOMIC BOTANY & ETHNOBOTANY
Code: BOT 5 B 08 T

COURSE OUTCOMES (COs)

By the end of the course, students are expected to:

1. Critically evaluate the advantages of tissue culture and horticulture over conventional methods of propagation.
2. Apply various horticultural practices in the field
3. Identify the economically important plants

DISTRIBUTION OF TEACHING HOURS (18 hrs/Semester = 1hr/week)

Sl no	Subject	Theory	Practical	Total
1	Tissue culture	18	12	30
2	Horticulture	18	12	30
3	Economic Botany	9	9	18
4	Ethnobotany	9	3	12
Total		54	36	90

QUESTION PAPER PATTERN & SUBJECT WISE DISTRIBUTION OF MARKS

Type of questions	Tissue cult	Horticultur	Econ. Bot	Ethnobot.	Total
2 marks (total 12)	5	5	1	1	Ceiling 20
5 marks (total 7)	3	2	1	1	Ceiling 30
10 marks (total 2)	1	1	-	-	1x10 = 10
TOTAL					60

TISSUE CULTURE

Module-1

1. Plant tissue culture – Principles and techniques; Cellular totipotency; *in vitro* differentiation – de differentiation and re-differentiation.
3. Tissue culture medium – Basic components in tissue culture medium – Solid and liquid medium; Murashige and Skoog medium – composition and preparation.
4. Aseptic techniques in *in vitro* culture – sterilization – different methods – sterilization of instruments and glassware, medium, explants; working principle of laminar air flow and autoclave.
5. Preparation of explants – surface sterilization, inoculation, incubation, subculturing.
6. Micropropagation - Different methods – apical, axillary bud proliferation, direct and indirect organogenesis and somatic embryogenesis.
7. Different phases of micropropagation – multiple shoot induction, shoot elongation, *in vitro* and *in vivo* rooting hardening, transplantation and field evaluation;

Advantages and disadvantages of micropropagation. Somaclonal variation.

Module – II (9 hrs)

1. Methods and Applications of tissue culture:
 1. Shoot tip and meristem culture
 2. Somatic embryogenesis and synthetic seed production
 3. Embryo culture
 4. Protoplast isolation culture and regeneration – transformation and transgenics
 5. Somatic cell hybridization, cybridization.
 6. *In vitro* secondary metabolite production — cell immobilization, bioreactors
 7. *In vitro* production of haploids – anther and pollen culture
 8. *In vitro* preservation of germplasm

PRACTICALS (TISSUE CULTURE)

1. Preparation of nutrient medium – Murashige and Skoog medium using stock solutions,
2. Familiarize the technique of preparation of explants, surface sterilization, inoculation and subculturing.
3. Preparation of synthetic seeds
4. Demonstration of anther culture

5. Madhavi Adhav (2010) Practical book of Biotechnology and Plant Tissue culture
6. Bhojwani, San Saran, Danu, Prem Kumar (2013) Tissue Culture : An Introductory Text

HORTICULTURE

Module - I. (6 hrs)

1. Introduction, scope and significance; branches of horticulture.
2. Soil- components of soil, types of soil.
3. Fertilizers – Chemical, organic, biofertilizer, compost.
4. Pots & potting – earthen, fibre, polythene bags, potting mixture, potting, repotting, top

dressing.

5. Irrigation – Surface, sprinkle, drip and gravity irrigation.

Module – II (6 hrs)

1. Seed propagation –seed quality tests, seed treatment, essential condition for successful propagation – raising of seed beds, transplanting techniques.
2. Vegetative propagation: (a) Cutting (stem, roots)
 1. Grafting (approach, cleft)
 2. Budding (T-budding, patch)
 3. Layering (simple, air).

Module - III. (6 hrs)

1. Gardening – site selection; propagating structure: green house, poly house, moist chamber, net frame – Garden tools and implements.
2. Indoor gardening – selection of indoor plants, care and maintenance of indoor plants, Bonsai – Principle, creating the bonsai.
3. Outdoor gardening; landscaping- goals, types.
4. Cultivation and post-harvest management of vegetables and ornamental plants.
5. Protection of Horticultural plants: Precautions to avoid pests and diseases. Bio pesticides
6. Mushroom cultivation – Oyster mushroom

PRACTICALS (HORTICULTURE)

1. Preparation of nursery bed and polybag filling.
2. Preparation of potting mixture – Potting, repotting.
3. Field work in cutting, grafting, budding, layering (drawing not required).
4. Familiarizing gardening tools and implements. (drawing not required)
5. Establishment of vegetable garden/ Visit to a horticulture station.
6. A brief report of item no. 5 may be recorded.

ECONOMIC BOTANY

Study the different category of economically important plants their Binomial, Family and Morphology of useful part, products and uses:

1. Cereals and Millets – Rice, Wheat, Maize and Ragi
2. Pulses and legumes – Green gram, Bengal gram, Black gram,
3. Sugar – Sugar cane
4. Fruits – Apple, Pine Apple, Papaya, Banana, Mango, Guava, Jack, Grapes, Sapota.
5. Vegetables – Carrot, Beet Root, Corm, Potato, bitter gourd, Cucumber, Snake gourd, Ladies finger, Cabbage, *Amaranthus*,
6. Ornamentals – Rose, *Anthurium*, Jasmine.
7. Masticatories – Betel vine, Betel nut, Tobacco.
8. Beverages – Coffee, Tea, Cocoa.
9. Fibre – Coir, Cotton, Jute.
10. Timber – Teak, Rose wood, Jack, Ailanthus.
11. Fats and oils – Coconut, Gingelly, Sun flower.
12. Latex – Rubber
13. Gums and Resins – Dammar, Gum Arabic, Asafetida
14. Spices – Pepper, Ginger, Cardamom, Clove, Nutmeg, Allspice, Cinnamon
15. Medicinal – *Adhatoda*, *Catharanthus*, *Phyllanthus*, *Rauwolfia*, *Aloe*,

PRACTICALS (ECONOMIC BOTANY)

1. Students shall be able to identify plants or plant products (raw or processed) studied in theory and shall be able to write Botanical names, Family and morphology of useful parts of source plants.
2. Students need not make any illustrations but make a table in the record giving the details of the items mentioned in the theory syllabus.

REFERENCES (ECONOMIC BOTANY)

1. Bendre Kumar 2000: Economic Botany' Rastogi Publications, Shivaji road, Meerut.
2. Jain. S. K. 1981. Glimpses of Indian Economic Botany. Oxford.
3. Kochhar, S.L. (2011). Economic Botany in the Tropics, MacMillan Publishers India Ltd., New Delhi. 4th edition.

ETHNOBOTANY

1. Introduction, scope and significance
2. Major tribes of South India
3. Ethnobotanic significance of the following:

1. *Aegle marmelos*
2. *Ficus religiosa*
3. *Curcuma longa*
4. *Cynadon dactylon*
5. *Ocimum sanctum*
6. *Trichopus zeylanica*

PRACTICALS (ETHNOBOTANY)

Students are expected to identify the plants mentioned in the Ethnobotany syllabus and it must be given as a table showing Common name, Binomial, Family and Ethnobotanical significance in the record book. (Drawing not required)

REFERENCES (ETHNOBOTANY)

2. Jain. S. K. (1995). A Manual of Ethnobotany. Scientific Publishers , Jodhpur.
3. Cotton, C.M. (1996) Ethnobotany – Principles and Applications. Wiley and Sons.

FIFTH SEMESTER B. Sc. BOTANY DEGREE PROGRAMME
CORE COURSE-9:
CELL BIOLOGY AND BIOCHEMISTRY
Code: BOT 5 B 09 T

COURSE OUTCOMES (COs)

By the end of the course, students are expected to:

1. Appreciate the ultra-structure of a plant cell
2. Enumerate the functions of each cell organelle.
3. Explain the structure of biomolecules.
4. Draw the structure of biomolecules.

DISTRIBUTION OF TEACHING HOURS (18 hrs/Semester = 1hr/week)

Sl no	Subject	Theory	Practical	Total
1	Cell Biology	27	9	36
2	Biochemistry	27	27	54
Total		54	36	90

QUESTION PAPER PATTERN & SUBJECT WISE DISTRIBUTION OF MARKS

Type of questions	Cell Biology	Biochemistry	Total
2 marks (total 12)	6	6	Ceiling 20
5 marks (total 7)	4	3	Ceiling 30
10 marks (total 2)	1	1	1x10 = 10
TOTAL			60

CELL BIOLOGY

Module – I.

1. Architecture of cells. Prokaryotic and Eukaryotic cells.
2. Structure and function of the following: Cell membrane (fluid mosaic model), Endoplasmic reticulum, Golgi complex, mitochondria chloroplast, Lysosomes Glyoxisomes Ribosomes Cytoskeleton Cytosol Vacuole
3. Nucleus - Nuclear membrane; Nuclear pore complex; organization of interphase Nucleus; Euchromatin and heterochromatin; Nucleolus.
4. Chromosomes - Morphology, classification, Centromere and Telomere, Chemical Composition and organization.

Module-II

1. Special types of chromosomes –Polytene chromosomes, lampbrush chromosomes
2. Cell division - cell cycle - Mitosis & Meiosis – significance- molecular control of cell division
3. Chromosomal changes - structural aberrations: deletion, duplication, inversion, translocation - their meiotic consequences and significance

- Numerical aberration - Definition - Basic chromosome number (Genomic Number) Aneuploidy, Haploidy and Polyploidy - their meiotic behaviour and significance.

PRACTICALS (CELL BIOLOGY)

- Mitosis - Acetocarmine squash preparation of Onion root tip.
- Calculation of mitotic index
- Demonstration of meiosis in *Rhoeo/Chlorophytum/ Maize* and identification of different stages of Meiosis.

REFERENCE (CELL BIOLOGY)

- Rastogi. V.B. (2008) Fundamentals of Molecular Biology, Ane Books India.

BIOCHEMISTRY

- Macromolecules-building block biomolecules - metabolic intermediates-precursors).
- Carbohydrates. Classification; structure and functions of simple sugars and compound carbohydrates.
- Lipids. Classification. Complex lipids, Simple lipids and derived lipids; Fatty acids saturated and unsaturated, triacyl glycerols, phospholipids, sphingolipids. Amino acids, peptides and proteins. Amino acids: classification based on polarity; zwitterions, Dipeptides.
- Proteins: Primary, secondary, tertiary and quaternary structures of proteins. Native conformation and biological functions of proteins. Denaturation and renaturation.
- Nucleotides structure of nucleotides. Functions of nucleotides and nucleotide derivatives.
- Secondary metabolites. A brief account of secondary metabolites, physiological roles. Significance: ecological importance.
- Enzymes Classification (IUB), Mechanism of enzyme action, optimization of weak interactions in the transition state. Co-enzymes, inhibition, regulation: allosteric enzymes, covalently modulated enzymes. Isoenzymes.

PRACTICALS (BIOCHEMISTRY)

1. Qualitative tests for monosaccharides, and reducing non reducing oligosaccharides, starch, amino acids and protein.
 - a. Molisch's test for all carbohydrates
 - b. Benedict's test for reducing sugars
 - c. Barfoed's test for monosaccharides
 - d. Seliwanoff's test for ketoses
 - e. Fearson's test (methyl amine test) for reducing disaccharides
 - f. Iodine test for starch
 - g. Ninhydrin test for amino acids and protein
 - h. Xanthoproteic test for amino acids with aromatic R-groups
 - i. Millon's test for tyrosine
 - j. Hopkins- Cole test for tryptophan
 - k. Biuret test for peptide linkage and proteins
2. Quantitative estimation of protein by Biuret method. (Demonstration only)
3. Quantitative estimation of DNA and RNA by colorimetric/ spectrophotometric method (Demonstration only)
4. Colorimetric estimation of reducing sugars in germinating seeds (Demonstration only)

SIXTH SEMESTER B. Sc. BOTANY DEGREE PROGRAMME
CORE COURSE- 10
GENETICS AND PLANT BREEDING
Code: BOT 6 B 10 T

COURSE OUTCOMES (COs)

By the end of the course, students are expected to:

1. Appreciate the facts behind heredity and variations
2. Understand the basic principles of inheritance
3. Solve problems related to classical genetics.
4. Predict the pattern of inheritance
5. Understand various plant breeding techniques
6. Realize the role of plan breeding in increasing crop productivity

DISTRIBUTION OF TEACHING HOURS (18 hrs/Semester = 1hr/week)

Sl no	Subject	Theory	Practical	Total
1	Genetics	36	27	63
2	Plant breeding	18	9	27
Total		54	36	90

QUESTION PAPER PATTERN & SUBJECT WISE DISTRIBUTION OF MARKS

Type of questions	Genetics	Plant breeding	Total
2 marks (total 12)	8	4	Ceiling 20
5 marks (total 7)	4	3	Ceiling 30
10 marks (total 2)	2		1x10 = 10
Total			60

GENETICS

Module - I

1. Introduction- Brief account of Mendel's life history: Mendelian experiments: Monohybrid cross and dihybrid cross, Mendelian ratios, Laws of inheritance; Back cross, test cross.
2. Modified Mendelian ratios:
 - a. Allelic interactions: dominant – recessive, Incomplete dominance – flower color in *Mirabilis*; Co dominance – Coat colour in cattle, Blood group in human beings; Lethal genes – Sickle cell anemia in Human beings. Modified dihybrid ratios by incomplete dominance of one pair of gene (3:6:2:1:2:1) and both pairs (1:2:1:2:4:2:1:2:1).
 - b. Interaction of genes: Non epistatic - Comb pattern inheritance in poultry (9:3:3:1): Epistasis: dominant - Fruit colour in summer squashes; Recessive epistasis - Coat color in mice; Complementary gene interaction- flower color in *Lathyrus* .
3. Multiple alleles- general account: ABO blood group in man, Self sterility in *Nicotiana*, Coat colour in Rabbits.
4. Quantitative inheritance / polygenic inheritance / continuous variation- Skin color in

human beings, Ear size in maize. .

Module -II

1. Linkage and crossing over- importance of linkage, linkage and independent assortment. Complete and incomplete linkage. Crossing over general account, 2 point and 3 – point crossing over, cytological evidence of genetic crossing over. Determination of gene sequences; interference and coincidence; mapping of chromosomes.
2. Extra nuclear inheritance- general account- maternal influence- plastid inheritance in *Mirabilis*, Shell coiling in snails.
3. Population genetics; Hardy –Weinberg law and equation

PRACTICAL (GENETICS)

1. Students are expected to work out problems related to the theory syllabus. One problem each from all the types mentioned should be recorded.
 - a. Monohybrid cross
 - b. Dihybrid cross
 - c. Test cross and back cross
 - d. Determination of genotypic and phenotypic ratios and genotype of parents
 - e. Non epistasis
 - f. Complementary gene interaction
 - g. Epitasis: dominant and recessive
 - h. Polygenic interaction
 - i. Multiple allelism
 - j. Chromosome mapping
 - k. Calculation of Coincidence and interference

PLANT BREEDING

Module-I

1. Definition and objectives of Plant breeding – Organization of ICAR and its role in plant breeding.
2. Plant Genetic Resources - Components of Plant Genetic Resources.

Module-II

1. Breeding techniques –
 - a. Plant introduction: Procedure, quarantine regulations, acclimatization- agencies of plant introduction in India, major achievements.
 - b. Selection -mass selection, pureline selection and clonal selection, genetic basis of selection, significance and achievements.
 - c. Hybridization – procedure; intergeneric, interspecific and intervarietal hybridization with examples; composite and synthetic varieties.
 - d. Heterosis breeding - genetics of heterosis and inbreeding depression.
 - e. Mutation breeding – methods - achievements.
 - f. Polyploidy breeding
 - g. Breeding for disease and stress resistance
2. Modern tools for plant breeding: Genetic Engineering and products of genetically modified crops (brief mentioning only).

PRACTICAL (PLANT BREEDING)

1. Techniques of emasculation and hybridization of any bisexual flower.
2. Floral biology of Paddy, any one Pulse and Coconut tree.
3. Visit to a plant breeding station and submission of its report.

REFERENCES (PLANT BREEDING)

SIXTH SEMESTER B. Sc. BOTANY DEGREE PROGRAMME
CORE COURSE- 11
BIOTECHNOLOGY, MOLECULAR BIOLOGY & BIOINFORMATICS
Code: BOT 6 B 11 T

COURSE OUTCOMES (COs)

By the end of the course, students are expected to:

1. Analyze the role of biotechnology in daily life
2. Understand the basic aspects of bioinformatics.
3. Explain the concepts in molecular biology

DISTRIBUTION OF TEACHING HOURS (18 hrs/Semester = 1hr/week)

Sl no	Subject	Theory	Practical	Total
1	Biotechnology	18	12	30
2	Molecular Biology	18	12	30
3	Bioinformatics	18	12	30
Total		54	36	90

QUESTION PAPER PATTERN & SUBJECT WISE DISTRIBUTION OF MARKS

Type of questions	Biotechnology	Molecular Biol.	Bioinformatics	Total
2 marks (total 12)	4	4	4	Ceiling 20
5 marks (total 7)	2	2	3	Ceiling 30
10 marks (total 2)	2			1x10 = 10
Total				80

BIOTECHNOLOGY

Module -I

- a. Recombinant DNA Technology: Gene cloning strategies – recombinant DNA construction – cloning vectors – plasmids pBR322, bacteriophage based vectors, Ti plasmids. Restriction endonucleases and ligases transformation and selection of transformants – using antibiotic resistances markers, southern blotting; PCR.
- b. Different methods of gene transfer – chemically stimulated DNA uptake by protoplast, electroporation, microinjection, biolistics. Agrobacterium mediate gene transfer gene library, gene banks.

Module -II

1. Application of Biotechnology in:
 - a. Medicine - Production of human insulin, human growth hormone and
 - b. Forensics - DNA finger printing.
 - c. Agriculture - Genetically modified crops – Bt crops, Golden rice, Flavr Savr Tomato, Virus, herbicide resistant crops, Edible vaccines.

- d. Environment- Bioremediation- use of genetically engineered bacteria-super bug.
- e. Industry- Horticulture and Floriculture Industry, production of vitamins, amino acids and alcohol.

PRACTICAL (BIOTECHNOLOGY)

1. Extraction of DNA from plant tissue.
2. Study of genetic engineering tools and techniques using photographs/diagram (Southern blotting, DNA finger printing, PCR,)

REFERENCES (BIOTECHNOLOGY)

1. Brown TA (2006) Gene cloning and DNA analysis; Blackwell scientific publishers
2. Chawla HS (2000) Introduction to Plant Biotechnology

8. Purohit SS (2003) Agricultural Biotechnology, Agrobios (India)
9. Sobti RC & Pachauri SS (2009) Essentials of Biotechnology; Ane Books, New Delhi.

MOLECULAR BIOLOGY

Module – I.

1. Nucleic acids - DNA – the genetic material; the discovery of DNA as the genetic material; bacterial transformation (Griffith's & Avery's experiments); Hershey and Chase experiment; Structure of DNA, Watson & Crick's Model, Types of DNA-(A,B,Z); Replication –semi conservative replication – Meselson and Stahl's experiment; Molecular mechanism of Replication, RNA- structure, types and properties.
2. Gene action - One gene - one enzyme hypothesis, one cistron one polypeptide hypothesis; concept of colinearity; modern concept of gene-cistrons, recons and mutons
3. Genetic code - Characters of genetic code
4. Central dogma protein synthesis; Transcription, post-transcriptional modification of RNA, translation; Teminism.
5. Gene regulation in prokaryotes - operon concept, (Lac operon, trp. operon)
6. Gene regulation in eukaryotes (brief account)
7. Mutation-spontaneous and induced; causes and consequences. Types of mutagens and their effects. Point mutations- molecular mechanism of mutation-Transition, Transversion and substitution

SUBMISSION (MOLECULAR BIOLOGY)

1. Visit a research station with well-equipped biotechnology / Molecular biology lab and submit a duly certified detailed report of the same during the practical examination.

REFERENCES (MOLECULAR BIOLOGY)

1. Brown T A. (2003) Genomes. John Willey and Sons.

BIOINFORMATICS**Module-I**

1. IT in teaching, learning and research: Web page designing and web hosting. Academic web sites, e-journals, Open access initiatives and open access publishing, education software, academic services - INFLIBNET, NICNET, BRNET.
2. e-wastes and green computing.
3. Futuristic IT - Artificial intelligence, virtual reality, bio-computing.

Module- II

1. Introduction to Bioinformatics, brief history, scope and relevance, wet lab to web lab
2. Basics of Genomics, Proteomics and comparative genomics
3. Biological data bases:
Nucleotide sequence database – EMBL, Gen Bank, DDBJ.
Protein database – SwissProt, PDB,
Organismal database /Biodiversity database – Species 2000 /Human genome database
4. Information retrieval from Biological database, sequence alignment types and tools: pair wise sequence alignment multiple sequence alignment, BLAST, Clustal W

Module- III:

1. Genomics: DNA sequencing Sangers procedure-automation of DNA sequencing, genome sequence assembly.
2. Genome projects – Major findings and relevance of the following genome projects – Human, Arabidopsis thaliana, Rice, Haemophilus influenza.
3. Proteomics : Protein sequencing- automation of sequencing, protein structure prediction and modelling (Brief account only)

Module- IV

A brief account on

1. Molecular phylogeny and phylogenetic trees.
2. Molecular visualization – use of Rasmol.

3. Molecular docking and computer aided drug design.

PRACTICAL (BIOINFORMATICS)

1. Familiarizing with the different data bases mentioned in the syllabus.
2. Molecular visualization using Rasmol.
3. Blast search of nucleotide sequences.

REFERENCE (BIOINFORMATICS)

SIXTH SEMESTER B. Sc. BOTANY DEGREE PROGRAMME
CORE COURSE-12:
PLANT PHYSIOLOGY AND METABOLISM
Code: BOT 6 B12 T

COURSE OUTCOMES (COs)

By the end of the course, students are expected to:

1. Identify the physiological responses of plants
2. Analyze the role of external factors in controlling the physiology of plants.
3. Explain the metabolic processes taking place in each cell.
4. Appreciate the energy fixing and energy releasing processes taking place in cells

DISTRIBUTION OF TEACHING HOURS (18 hrs/Semester = 1hr/week)

Sl no	Subject	Theory	Practical	Total
1	Module 1	9	36	45
2	Module II	9		9
3	Module III	14		14
4	Module IV	9		9
5	Module V	13		13
Total		54	36	90

QUESTION PAPER PATTERN & SUBJECT WISE DISTRIBUTION OF MARKS

Type of questions	Mod. 1	Mod. II	Mod. III	Mod. IV	Mod. V	Total
2 marks (total 12)	2	2	3	2	3	Ceiling 20
5 marks (total 7)	1	1	2	1	2	Ceiling 30
10 marks (total 2)	2					1x10 = 10
TOTAL						60

Module - 1.

1. Plant cell and Water. Water as a solvent; cohesion and adhesion. Diffusion, osmosis, osmotic pressure, concept of water potential, components of water potential, osmotic potential, turgor pressure, imbibition, matric potential.
2. Transpiration. Types and process. Mechanism of guard cell movement. K⁺ ion mechanism. Why transpiration? Antitranspirants.
3. Absorption of water by transpiration pull and cohesion of water molecules. Radial movement of water through root. Soil-plant-atmosphere continuum of water.

Module-II

1. The ascent of sap; Transpiration pull and cohesion of water molecules. Merits and demerits of cohesion-tension theory.
2. Plants and inorganic nutrients. Macro and Micro nutrients. Uptake of mineral elements. Difference between passive uptake and active uptake. Simple and facilitated diffusion. Active uptake. Carrier concept. Evidences.

Module - III

1. Photosynthesis in higher plants: Photosynthetic apparatus. Electromagnetic radiation. Absorption of light. Fluorescence and phosphorescence. Organization of light harvesting antenna pigments. Photochemical and chemical phases of photosynthesis and its evidences. Red drop and Emerson enhancement effect. Two pigment systems, components. Photosynthetic electron transport and photophosphorylation. Assimilatory powers- ATP and NADPH. Photosynthetic carbon reduction cycle (PCR), RUBISCO, C3, C4, and CAM pathways. Ecological significance of C4, and CAM metabolism. Photorespiration.
2. Biological nitrogen fixation, symbiotic nitrogen fixation in leguminous plants. Biochemistry of Nitrogen fixation. Genetics of nitrogen fixation, Ammonia assimilation, assimilation of nitrate. Biosynthesis of amino acids.
3. Translocation and distribution of photo assimilates. Mechanism of phloem transport. Phloem loading and unloading; pressure flow hypothesis.

Module - IV

1. Plant growth and development. Auxins, gibberellins, cytokinins, abscisic acid and ethylene, their physiological roles. Photoperiodism and vernalization.
2. Plant movements -Phototropism, gravitropism. Nyctinastic and seismonastic movements.
3. Photomorphogenesis: Phytochrome: chemistry and physiological effects.
4. Seed dormancy and germination.

Module – V

1. Intermediary metabolism: anabolism, catabolism, amphibolic pathways and anapleurotic reactions.
2. Catabolism of hexoses. Glycolysis: Two phases of glycolysis. Overall balance sheet. Fate of pyruvate under aerobic and anaerobic conditions. Citric acid cycle: Formation of acetate, Reaction of citric acid cycle, Anapleurotic reactions of citric acid cycle. Amphibolic nature of citric acid cycle.
3. Oxidation of fatty acids. β oxidation of saturated fatty acids in plants.
4. Oxidative phosphorylation: Electron transport reactions in mitochondrion. Electron carriers, redox potential, electron carriers functioning as multienzyme complexes, ATP synthesis. Chemiosmotic hypothesis, cyanide-resistant respiration, factors affecting respiration

PRACTICALS

Students should familiarize experiments and details must be recorded. (Drawing not required)

1. Fruit ripening/Rooting from cuttings (Demonstration).
2. Relation between water absorption and transpiration.
3. Separation of leaf pigments by paper chromatography/ column chromatography /TLC.
5. Effects of light intensity on photosynthesis by Wilmot's bubbler.

4. Thistle funnel osmoscope
5. Ganong's Potometer
6. Ganong's light-screen
7. Ganong's respirometer
8. Kuhne's fermentation vessel
9. Mohl's half-leaf experiment
10. Absorbotranspirometer
11. Demonstration of gravitropism using Klinostat.

SIXTH SEMESTER B. Sc. BOTANY DEGREE PROGRAMME
CORE COURSE-13:
ENVIRONMENTAL SCIENCE
Code: BOT 6 B13 T

COURSE OUTCOMES (COs)

By the end of the course, students are expected to:

1. Realize the importance of ecological studies.
2. Develop environmental concern in all their actions.
3. Try to reduce pollution and environmental hazards.
4. Spread awareness of the need of conservation of biodiversity and natural resources.
5. Analyze the reasons for climate change and find out ways to combat this.

DISTRIBUTION OF TEACHING HOURS (18 hrs/Semester = 1hr/week)

Sl no	Subject	Theory	Practical	Total
1	Module 1	14	9	25
2	Module II	13	9	16
3	Module III	14	9	25
4	Module IV	13	9	24
Total		54	36	90

QUESTION PAPER PATTERN & SUBJECT WISE DISTRIBUTION OF MARKS

Type of questions	Module 1	Module II	Module III	Module IV	Total
2 marks (total 12)	3	3	3	3	Ceiling 20
5 marks (total 7)	2	2	2	1	Ceiling 30
10 marks (total 2)	2				1x10 = 10
TOTAL					60

ENVIRONMENTAL SCIENCE

Module - I

1. Ecosystem – Definition ; abiotic and biotic factors; trophic structure; Food chain and food web; Ecological pyramids; Energy flow; Productivity of ecosystems.
2. Biogeochemical cycles (Carbon, Nitrogen, Phosphorous)
3. Plant adaptations: Adaptations in Hydrophytes, Xerophytes, Halophytes, Epiphytes and Parasites.
4. Plant Succession: Definition – Primary and Secondary succession; Autogenic and allogenic succession; Mechanism of plant succession–Xerosere and Hydrosere

Module-II

- 1 Biodiversity and Conservation: Definition; Biodiversity - Global and Indian Scenario; Megadiversity nations and hotspots: Biosphere reserves; Biodiversity centres in India.

- 2 Threats to biodiversity; Endangered and endemic plant species – Red data book - Exotic and indigenous plant species – Keystone species – Flagship species.
- 3 Conservation strategies *ex situ* and *in situ* methods. Organizations–IUCN, UNEP & WWF; (NBPGR) Biodiversity Board of Kerala (KSBDB).

Module-III

- 1 Pollution: Sources and types of pollution – air, water, soil, thermal and noise; biodegradable and non-biodegradable pollutants; biomagnifications; BOD.
- 2 Global environmental changes – climatic changes – global warming and greenhouse gases – acid rains – el-nino – Efforts of world organizations in the regulation of greenhouse gases emission.
- 3 Management of environmental pollution – conventional and phytotechnological approaches – solid wastes management including e-wastes- environmental legislations in India (Prevention and Control of Pollution act, 1981).

Module- IV

- 1 Major ecosystems of the Biosphere; Sea; Estuarine ecosystem; Lentic ecosystem: lake, Pond; Lotic ecosystem: river; Desert; Forest; grass land.
- 2 Techniques in plant community studies – Quadrat and transect methods –species area curve – density, frequency, abundance, dominance of populations– importance value index – construction of phytographs.

PRACTICAL

1. Construct a food web from the given set of data, (Representative of a natural ecosystem). (Drawing not required).
2. Construct ecological pyramids of number, biomass, energy from the given set of data (Representative of a natural ecosystem). (Drawing not required).
3. Study of plant communities: Determination of density, abundance, dominance, frequency by quadrat method.
4. Demonstration of determination of Dissolved Oxygen by Winkler's method.
5. Study of morphological and anatomical characteristics of plant groups: Hydrophytes, Xerophytes, halophytes, epiphytes, parasites. (Drawing not required).
6. Estimation of solid waste generated by a domestic system (biodegradable and nonbiodegradable) and its impact on land degradation.

ELECTIVE PAPERS

SIXTH SEMESTER B. Sc. BOTANY DEGREE PROGRAMME
CORE COURSE-14: Elective-1: GENETIC ENGINEERING
Code: BOT 6 B 14 T (E1)

COURSE OUTCOMES (COs)

By the end of the course, students are expected to:

1. Explain various techniques employed for genetic engineering.
2. Develop general awareness on genetically modified organisms.
3. Ethical, Social and legal issues associated with genetic engineering

DISTRIBUTION OF TEACHING HOURS (18 hrs/Semester = 1hr/week)

Sl no	Subject	Theory	Practical	Total
1	Module 1	12	36	48
2	Module II	15		15
3	Module III	15		15
4	Module IV	12		12
Total		54	36	90

QUESTION PAPER PATTERN

Type of questions	No of questions	Total marks
2 marks	12	Ceiling 20
5 marks	7	Ceiling 30
10 marks	2	1x10 = 10
TOTAL	21	60

GENETIC ENGINEERING

Module -I

Introduction to gene cloning

1. DNA isolation; DNA isolation solutions, isolation buffer pH, concentration and ionic strength, DNase inhibitors, detergents used for isolation, methods for breaking the cells
2. Removal of proteins from cell homogenate; using organic solvents, Kirby method and Marmur method, using CTAB
3. Removal of RNA; using RNase A, RNase T1
4. Concentrating the isolated DNA; precipitating with alcohols, salts added along with alcohol
5. Determination of the concentration and purity of DNA; using UV spectrophotometry
6. Storage of DNA samples
7. Commercially available kits for genomic and plasmid DNA isolation
8. Preparation of genomic DNA from animal cells, plant cells and bacterial cells; protocol for

small scale and large scale preparations

9. Isolation of plasmid DNA; protocol for small scale and large scale preparations
10. Isolation and purification of RNA; purification of total RNA, RNase inhibitors, preparation of cell material, preparation of glass wares, guanidinium hot phenol method, high salt lithium chloride method, isolation of poly A RNA

Module-II

Agarose Gel electrophoresis of DNA and RNA

1. Principles of electrophoresis,
2. Buffers used for electrophoresis of nucleic acids,
3. Gel concentration, sample concentration, sample loading solutions,
4. Gel staining,
5. Determination of molecular weight using molecular weight markers, special precautions and treatments required for electrophoresis of RNA, Elution of DNA from agarose gels; electroelution, using low-melting point agarose.
6. Nucleic acid transfer and hybridization; Southern blot transfer, dot-blot transfer, plaque and colony transfer, Southern blot hybridization, Northern blot transfer and hybridization, in situ hybridization
7. Preparation of probes for hybridization, radioactive labeling, digoxigenin labeling, nick translation, preparation of primer using PCR, RNA probes

Module - III

Principle of DNA cloning

1. Cloning vectors; essential features of a cloning vector, plasmid derived vectors, bacteriophage derived vectors, hybrid vectors, high capacity cloning vectors; BACs, PACs and YACs, Agrobacterium based vectors, shuttle vectors, expression vectors
2. Enzymes used in recombinant DNA technology; type II restriction endonucleases, ligases, S1 nuclease, alkaline phosphatase, terminal transferase, DNA polymerase I, reverse transcriptase, exonuclease III, bacteriophages λ exonuclease,
3. Finding gene of interest; shot gun cloning followed by screening, construction and use of genomic DNA library and cDNA library, screening DNA libraries, chromosome walking, in silico gene discovery, cloning of the gene of interest, altering the gene of interest through site directed mutagenesis,
4. Preparation of recombinant DNA molecule, blunt ends and sticky ends, using tailing method, using polylinkers
5. Methods to transfer the recombinant DNA molecule into the cloning host; transformation, transfection, transduction, electroporation, microinjection, microprojectiles and DNA gun, Agrobacterium mediated transfer
6. Methods to select the recombinants; antibiotic markers, insertional inactivation, replica plating, blue-white selection, use of reporter genes; GUS, luciferase and GFP genes

Module -IV

Transgenesis; introduction to transgenic organisms and their applications.

1. Mechanism of gene transfer into eukaryotic cells, transfection methods; using polyethelene glycol, chemical transfection using lithium acetate, calcium phosphate, and DEAE-dextran, lipofection, electroporation, microinjection, DNA gun, fate of DNA transferred to eukaryotic cells, random integration transgenesis – gain of function effects and loss of function effects, gene targeting,
2. Examples of transgenic crop plants and animals
3. Antisense and RNAi technology
4. Production of knock out models and their use
5. Applications of recombinant DNA technology
6. Ethical, Social and legal issues associated with recombinant DNA technology

PRACTICAL:

Students should be given sufficient exposure to the experiments listed below either by visiting nearby biotechnology labs or showing video clippings of the same. Centers selecting this elective are supposed to procure the required facilities in the meantime.

Protocols of the listed experiments should be recorded.

1. Isolation of genomic DNA from plants and its quantification and purity checking using spectrophotometric method
2. Agarose gel electrophoresis of the isolated plant genomic DNA , its visualization and photography
3. Isolation of plasmid DNA from bacterium, and its quantification and purity checking using spectrophotometric method
4. Agarose gel electrophoresis of the isolated plasmid DNA , its visualization and photography
5. Preparation of competent E.coli cells
6. Preparation of recombinant plasmids , transformation of E.coli and selection of transformants

Record of the practical works done together with the detailed report of the Biotechnology Laboratory visit should be duly certified and submitted for the valuation at the time of practical examination.

SIXTH SEMESTER B. Sc. BOTANY DEGREE PROGRAMME
CORE COURSE-14: ELECTIVE-2:
ADVANCED ANGIOSPERM SYSTEMATICS
Code: BOT 6 B 14 T (E2)

COURSE OUTCOMES (COs)

By the end of the course, students are expected to:

1. Develop deep knowledge in the field of systematics.
2. Demonstrate ability to identify and classify plants in a faster and better way.
3. Apply imaging technologies in plant systematics.

DISTRIBUTION OF TEACHING HOURS (18 hrs/Semester = 1hr/week)

Sl no	Subject	Theory	Practical	Total
1	Module 1	12	36	48
2	Module II	22		22
3	Module III	5		5
4	Module IV	15		15
Total		54	36	90

QUESTION PAPER PATTERN

Type of questions	No of questions	Total marks
2 marks	12	Ceiling 20
5 marks	7	Ceiling 30
10 marks	2	1x10 = 10
Total	21	60

ADVANCED ANGIOSPERM SYSTEMATICS

Module -I

1. Scope and importance of Taxonomy.
2. The history of taxonomy- Ancient classification; Evolution of different concepts in taxonomy. The herbalists; Early taxonomists; Linnaeus; Post Linnaean natural systems; Post Darwinian phylogenetic; Modern Phenetic methods (Numerical taxonomy); Modern Phylogenetic methods (Cladistics). APG system of classification

Module-II

The material basis of Systematics

1. Concept of character; Correlation of characters; character weighting; Character variation, isolation and speciation.
2. Sources of Taxonomic characters: Morphology, Anatomy, Palynology, Embryology, Cytology, Phytochemistry, Molecular Taxonomy. Role of the above mentioned branches in taxonomic studies
3. Identification techniques: Taxonomic literature: Flora, Revision, monograph, use and construction of taxonomic keys. Herbarium: Definition, Steps involved in preparation and maintenance of herbarium, Herbarium consultation; General account of Regional

and National herbaria with special emphasis to Kew, CAL, MH, CALI.

4. Botanic gardens and their importance in taxonomic studies – Important National and International Botanic Gardens – Royal Botanic Gardens, Kew; Indian Botanic Gardens, Calcutta; National Botanic Garden, Lucknow; JNTBGRI Thiruvananthapuram; MBGIPS Kozhikode..
5. Digital resources in taxonomy: Softwares, Databases, Online tools; use of TROPICOS, IPNI, Virtual herbaria, Digital flora/databases of Flora of Kerala.

Module – III

Plant Nomenclature

1. History of nomenclature – Polynomial and binomial systems
2. Brief outline of ICN
3. Major rules; Typification; Rule of priority; Effective and valid publication; author citation

Module – IV

Taxonomic review of selected families as per APG system of classification

Critical study of the following families with emphasis on identification of local members, economic importance, inter relationships and evolutionary trends: Nymphaeaceae, Capparidaceae, Malvaceae, Rutaceae, Combretaceae, Lythraceae, Scrophulariaceae, Convolvulaceae, Bignoniaceae, Apocynaceae, Lamiaceae, Amaranthaceae, Urticaceae, Amaryllidaceae, Arecaceae, Cyperaceae

PRACTICALS:

1. Identification of locally available plants belonging to the families mentioned under module - IV using local floras.
2. Familiarize local flora and study the preparation of taxonomic keys and taxon card for plants coming under the families in module IV.
3. Students must work out at least one member of the every families mentioned in module IV, and has to submit a photo album instead of record. The photo album must be based on APG system of classification and it should carry details like systematic position, GPS location, date, name and reg. no. of the student etc. Separate images clearly showing habitat, habit, inflorescence type, single flower, floral parts etc. of the plant should be represented.

SIXTH SEMESTER B. Sc. BOTANY DEGREE PROGRAMME
CORE COURSE-14: Elective-3
GENETICS AND CROP IMPROVEMENT
Code: BOT 6 B 14 T (E3)

COURSE OUTCOMES (COs)

By the end of the course, students are expected to:

1. Understand various techniques employed for increasing crop productivity.
2. Identify diseases affecting crop plants
3. Attains general awareness on various crop research stations of the country.

DISTRIBUTION OF TEACHING HOURS (18 hrs/Semester = 1hr/week)

Sl no	Subject	Theory	Practical	Total
1	Module 1	11	36	47
2	Module II	10		10
3	Module III	4		4
4	Module IV	7		7
5	Module V	22		22
Total		54	36	90

QUESTION PAPER PATTERN

Type of questions	No of questions	Total marks
2 marks	12	Ceiling 20
5 marks	7	Ceiling 30
10 marks	2	1x10 = 10
Total	21	60

GENETICS AND CROP IMPROVEMENT

Module -1.

Crop genetics - General account of origin, genetic variability, floral biology, breeding techniques and achievements in: Rice, Coconut, Rubber, Arecanut, Cashew and Pepper

Module –II

1. Plant genetic resources- Definition; Classification of Plant Genetic resources. Activities– exploration, conservation, evaluation, documentation and utilization.
2. Agencies involved in plant genetic resources activities – NBPGR and IPGRI
3. International institutes for crop improvement – IRRI, ICRISAT, CIMMYT, IITA. Brief account on research activities and achievements of national institutes – IARI, CCMB, IISc, BARC, CPCRI, IISR, RRII, CTCRI, KFRI, TBGRI

Module- III

1. Methods of crop Improvement: a. Plant introduction b. Selection - Principles, Selection

of segregating populations, achievements c. Hybridization – Interspecific hybridization; intergeneric – achievements. Genetics of back crossing, Inbreeding, Inbreeding depression, Heterosis and Heterobeltiosis

Module - IV.

- 1 Heteroploidy in crop improvement – achievements and future prospects – Significance of haploids and polyploids
- 2 Mutations in crop improvement – achievements and future prospects
- 3 Genetics of nitrogen fixation – Use of biofertilizers in crop improvement
- 4 Genetics of photosynthesis

Module- V.

1. Breeding for resistance to abiotic stresses – Introduction, importance of abiotic and biotic stresses and its characteristics.
 1. Breeding for drought resistance – Genetics of drought resistance; Breeding methods and approaches; Difficulties in breeding for drought resistance.
 2. Breeding for mineral stress resistance – Introduction – Salt affected soils – Management of salt affected soils: Salinity resistance – General account.
2. Breeding for resistance to biotic stresses
 1. Disease resistance – History of breeding for disease resistance; Genetics of pathogenicity – Vertical and horizontal resistance; Mechanism of disease resistance; Genetics of disease resistance – Oligogenic, polygenic and cytoplasmic inheritance – Sources of disease resistance – Methods of breeding for disease resistance.
 2. Insect resistance – Introduction, Mechanism, Nature and genetics of insect resistance – Oligogenic, Polygenic and cytoplasmic resistance – sources of insect resistance – Breeding methods for insect resistance – Problems in breeding for insect resistance – Achievements – Breeding for resistance to parasitic weeds.

PRACTICALS

1. Visit a leading breeding station in South India and a detailed report should be included in the practical record. The record duly certified by HoD should be submitted at the time of practical examination.
2. Make illustrations on the floral biology of Rice, Cashew and *Solanum* spp.
3. Demonstration of hybridization in Rice, Cashew and *Solanum* and describe the procedure.
4. Study the variability under induced stress (salinity and moisture) of seedlings of rice and green gram and record the observations.

MODEL QUESTION PAPERS (THEORY) CORE COURSES

MODEL QUESTION PAPERS (PRACTICAL)

B.Sc. BOTANY CORE PRACTICAL EXAMINATION

Paper-I : BOT 4 B 05 P

(Angiosperm Anatomy, Reproductive Botany, Palynology, Microbiology, Mycology, Lichenology, Plant Pathology, Phycology, Bryology, Pteridology & Methodology and perspectives in Plant Science)

Time: 3 hours

Max: 80 marks

1. Prepare a T.S. of the given specimen **A, B and C**, draw the ground plan and cellular diagram of a portion enlarged and identify the specimen.
(Preparation-4; Drawing-3; Identification-1; Reasons-2) 10×3 = 30 Marks
2. Identify the given bacteria **D** and submit the micro preparation for valuation.
(Preparation-3) 3 x1 = 3 Marks
3. Prepare Histogram/Frequency polygon/ using the given data **E**
OR
Workout the given problem **E** (Chi square test) 5 x1 = 5 Marks
4. Identify the disease, pathogen and list out the symptoms from the given specimen **F** and **G**
(Disease identification-1, Pathogen – 1, Symptoms-1) 3×2 = 6 Marks
5. Determine the pollen viability of the sample **H** 6 x1 = 6 Marks
6. Spot at sight **I** to **W** 2×15=30 Marks

Practical examination	: 80 Marks
Record	: 15 Marks
Submission	: 5 Marks
Total	:100 Marks

B.Sc. BOTANY CORE PRACTICAL EXAMINATION

Paper – II : BOT 6 B15 P

(Gymnosperms, Palaeobotany, Phytogeography, Angiosperm Morphology, Systematics, Tissue culture, Horticulture, Economic Botany, Ethnobotany Cell Biology & Biochemistry)

Time: 4 hours

Max: 80 marks

1. Prepare T.S. of the given material **A**, draw labeled diagram and identify the specimen
7 x1 =7 Marks
2. Submit any two stages of mitosis using the given material **B**
(Preparation-2; Identification-2×2=4; Diagram-1×2=2)
8 x1 =8 Marks
3. Describe the given taxon **C**, determine the family and list out the salient features
(Identification-1; Technical description-4; Salient features-3)
8 x1 =8 Marks
4. Draw a labeled diagram of the V.S. of the flower **D**
4 x1 =4 Marks
5. Identify the given sample **E** qualitatively
8 x1 =8 Marks
6. Give the binomial, family and morphology of the following: **F, G & H**
(Binomial-1; Family-1; Morphology-1)
3×3 =9 Marks
7. Give the binomial, family and ethnobotanical significance of the following: **I and J**
(Binomial-1; Family-1; Ethnobotanical significance-1)
3×2 =6 Marks
8. Write down the binomial and family of **K, L, M and N**
(Binomial-1; Family ½)
1 ½ ×4 =6 Marks
9. Comment on the morphology of the specimen **O and P**
2.5 x 2= 5 Marks
10. Add critical note on the given specimen **Q and R**
1.5 x 2 =3 Marks
11. Spot at sight **S - Z**
8 x 2= 16 Marks

Practical	: 80 Marks
Record	: 15 Marks
Submission	: 10 Marks
Study tour	: 5 Marks
Total	: 110 Marks

B.S.C. BOTANY CORE PRACTICAL EXAMINATION

Paper – III : BOT 6 B16 P

(Genetics, Pl. Breeding, Biotechnology, Molecular Biology, Plant Physiology & Environmental Science)

Time: 4 hours

Max: 80 marks

- | | |
|--|-----------------|
| 1. Prepare a unidirectional chromatogram using the given extract A and calculate the Rf value of each component | 10 x1 = 10marks |
| 2. Workout the genetics problems B and C | 8 +7=15 marks |
| 3. Enumerate aim, procedure and inference of the experiment setup of D, E and F | 3x3 = 9 marks |
| 4. Isolate the DNA from the given sample G | 10 x1 = 10marks |
| 5. Demonstrate hybridization in Specimen H | 6 x1 = 6 marks |
| 6. Read the Gel from the diagram provided in I | 5 x 1 =5 marks |
| 7. Find out the ecological group of J and add a note on its adaptations | 5x1 = 5marks |
| 8. Spot at sights K – T | 2x10=20 marks |

Practical	: 80 Marks
Record	: 10 Marks
Submission	: 5 Marks
Total	: 95 Marks

FIRST SEMESTER COMPLEMENTARY BOTANY
COMPLEMENTARY COURSE: 1
ANGIOSPERM ANATOMY AND MICROTECHNIQUE
Course Code: BOT 1 C 01

COURSE OUTCOMES (COs)

By the end of the course, students are expected to:

1. Explain the types, structure and functions of plant tissues
2. Explain primary and secondary (normal and anomalous) structures of plant organs.
3. Identify plant organs by observing anatomical features.
4. Illustrate primary and secondary (normal and anomalous) structures of plant organs.
5. Apply the histochemical techniques in laboratory works

DISTRIBUTION OF TEACHING HOURS (18 hrs/Semester = 1hr/week)

Sl no	Subject	Theory	Practical	Total
1	Angiosperm Anatomy	27	30	57
2	Microtechnique	9	6	15
Total		36	36	72

QUESTION PAPER PATTERN & SUBJECT WISE DISTRIBUTION OF MARKS

Type of questions	Angiosperm Anatomy	Microtechnique	Total
2 marks (total 12)	9	3	Ceiling 20
5 marks (total 7)	5	2	Ceiling 30
10 marks (total 2)	2		1x10 = 10
TOTAL			60

ANGIOSPERM ANATOMY

Module - I

- 1 Tissues - Definition, Kinds - Meristematic & Permanent;
 1. Meristematic tissues - Classification – based on origin & position; Organization of root apex and differentiation of tissue – Histogen theory; Organization of stem apex and differentiation of tissues - Tunica & Corpus theory.
 2. Permanent tissues - Definition - classification; Simple tissues (Parenchyma, Collenchyma and Sclerenchyma), Complex tissues (Xylem & Pholem) Secretory tissues - Glandular tissues (Nectaries in *Euphorbia pulcherrima*, Stinging hairs in *Tragia*) Oil glands in *Citrus*, *Eucalyptus*; Digestive glands in *Nepenthes*; Laticiferous tissues (Non-articulate latex ducts in *Euphorbia* and articulate latex duct – latex vessels in *Hevea*). Hydathodes
- 2 Vascular bundles – types: conjoint - collateral, bicollateral, concentric and radial.

Module – II

1. Primary structure of dicot and monocot root, dicot and monocot stem and leaf in dicot and monocot

Module - III

1. Normal secondary thickening in dicot stem (*Vernonia*)
 - a. Intra stelar thickening: formation of cambial ring, its structure, fusiform and ray initials, storied and non - storied cambium, activity of the cambium, formation and structure of secondary wood, secondary phloem and vascular rays.
 - b. Extra stelar thickening: formation, structure and activity of the phellogen, formation of periderm in stem and root; bark and lenticel.
 - c. Growth rings, ring and diffuse porous wood, sapwood and heart wood, tyloses.
 - d. Normal secondary thickening in dicot root (*Tinospora*)
2. Anomalous secondary growth in *Boerhaavia*.

PRACTICALS (ANGIOSPERM ANATOMY)

1. Identity simple and complex tissues and determine the type of vascular bundles using microscope.
2. Make suitable micro preparations to study the anatomy of the following:
 - A. Dicot stem: *Cephalandra Centella* (Primary); *Vernonia* (secondary).
 - b. Monocot stem: Bamboo
 - c. Dicot root: *Tinospora* (young –Primary; mature –Secondary)
 - d. Monocot root: *Colocasia*,
 - e. Anomalous secondary growth (*Boerhaavia*).
 - f. Dicot leaf: *Ixora* and Monocot leaf: grass

MICROTECHNIQUE**Module - I**

Microtechnique - Brief Introduction

1. Microscopy: simple, compound and electron microscope
2. Microtomy: Rotary type, serial sectioning, paraffin method, significance.
3. Killing and fixing: Killing and fixing agents and their composition (Farmer's fluid and FAA.)
4. Dehydration and clearing - reagents (mention only)

5. Stains – Safranin and acetocarmine, preparation and use.

PRACTICALS (MICROTECHNIQUE)

- 1 Familiarise the structure and working of compound microscope (drawings not required)
- 2 Preparation of Safranin, FAA and Acetocarmine

REFERENCES (MICROTECHNIQUE)

SECOND SEMESTER COMPLEMENTARY BOTANY
COMPLEMENTARY COURSE: 2
CRYPTOGAMS, GYMNOSPERMS & PLANT PATHOLOGY
Course Code: BOT 2 C 02

COURSE OUTCOMES (COs)

By the end of the course, students are expected to:

1. Analyze the role of the lower plants in the process of evolution.
2. Explain the ecological significance of lower plants
3. Identify plant diseases and take remedial measures to control them.

DISTRIBUTION OF TEACHING HOURS (18 hrs/Semester = 1hr/week)

Sl no	Subject	Theory	Practical	Total
1	Module I: Virus, Bacteria, BGA	7	2	9
2	Module II: Phycology, Mycology, Lichenology	11	10	21
3	Module III: Bryology, Pteridology, Gymnosperms	15	10	25
4	Module IV: Plant Pathology	3	4	7
Total		36	36	72

QUESTION PAPER PATTERN & SUBJECT WISE DISTRIBUTION OF MARKS

Type of questions	Mod 1	Mod II	Mod III	Mod IV	Total marks
2 marks (total 12)	3	3	4	2	Ceiling 20
5 marks (total 7)	2	2	2	1	Ceiling 30
10 marks (total 2)	2				1x10 = 10
TOTAL					60

CRYPTOGAMS & GYMNOSPERMS

Module - I

1. Virus: General account of viruses, including structure of TMV & Bacteriophage.
2. Bacteria: Classification based on shape of flagella, structure, nutrition (brief account), reproduction and economic importance - agriculture, industry and medicine
3. Cyanobacteria: General Account structure, life - history and economic importance of *Nostoc*

Module - II

1. Phycology: General characters, classification, evolutionary trends in algae.
2. Structure, reproduction, life history and economic importance of the following classes with suitable examples:
 - a) Chlorophyceae (*Spirogyra*)

- b) Phaeophyceae (*Sargassum*)
 - c) Rhodophyceae (*Polysiphonia*).
3. Mycology: General characters, classification (Alexopoulos, 1979). (brief mention only) and evolutionary trends in fungi. Important features of the following divisions:
 - a) Mastigomycotina
 - b) Ascomycotina
 - c) Basidiomycotina.
 4. Structure and life history of *Puccinia* (developmental details not required)
 6. Lichenology: General account and economic importance of Lichens with special reference to *Usnea*.

Module - III

1. Bryology: General account, morphology and life - history of *Riccia*
2. Pteridology: General account, morphology and life history of *Selaginella*
4. Gymnosperms: General account, morphology and life history of *Cycas*

PRACTICALS (CRYPTOGAMS & GYMNOSPERMS)

1. Make suitable micro preparations of vegetative and reproductive structures of *Sargassum*, *Puccinia*, *Riccia*, *Selaginella* and *Cycas*
2. Identify and draw labeled diagrams of the types mentioned in the syllabus

PLANT PATHOLOGY

Module - I

1. Plant Pathology: Study the following plant diseases with special reference to pathogens, symptoms, method of spreading and control measures.
 - 1) Leaf mosaic of Tapioca
 - 2) Citrus canker
 - 3) Blast of paddy

PRACTICALS (PLANT PATHOLOGY)

1. Identify the diseases (mentioned in the theory syllabus) on the basis of symptoms and causal organisms. (Drawings can be replaced by photos pasted in the record)

REFERENCES: PLANT PATHOLOGY

1. Agros, G.N. (1997) Plant Pathology (4th ed) Academic Press.

THIRD SEMESTER COMPLEMENTARY BOTANY
COMPLEMENTARY COURSE 3:
MORPHOLOGY, SYSTEMATIC BOTANY, ECONOMIC BOTANY,
PLANT BREEDING AND HORTICULTURE

Course Code: BOT 3 C 03

COURSE OUTCOMES (COs)

By the end of the course, students are expected to:

1. Appreciates the diverse morphology of angiosperms.
2. Identify and classify plants based on taxonomic principles
3. Make scientific illustrations of vegetative and reproductive structures of plants
4. Identify the economically important plants
5. Understand the basic principles of plant breeding
6. Apply various horticultural practices in the field.

DISTRIBUTION OF TEACHING HOURS (18 hrs/Semester = 1hr/week)

Sl no	Subject	Theory	Practical	Total
1	Morphology	8	4	12
2	Systematic Botany	28	20	48
3	Economic Botany	4	4	8
4	Plant Breeding	7	4	11
5	Horticulture	7	4	11
Total		54	36	90

QUESTION PAPER PATTERN & SUBJECT WISE DISTRIBUTION OF MARKS

Type of questions	Morphol.	Syst. Bot.	Econ. Bot.	Pl. Br.	Horti.	Total
2 marks (total 12)	2	4	2	2	2	Ceiling 20
5 marks (total 7)	1	3	1	1	1	Ceiling 30
10 marks (total 2)	2					1x10 = 10
TOTAL						60

MORPHOLOGY

Module - I

1. Leaf – Structure, simple, compound, venation and phyllotaxy.
2. Inflorescence - racemose, cymose, special, types with examples
3. Flower - as a modified shoot- structure of flower - floral parts, their arrangement, relative position, cohesion and adhesion of stamens, symmetry of flowers, types of aestivation and placentation.

PRACTICALS (MORPHOLOGY)

1. Identify the types of inflorescence mentioned in the syllabus. All the types mentioned must be represented in the photo album. (All drawings in records are replaced by photo album submission).

REFERENCE (MORPHOLOGY)

- 1 Sporne, K.R. (1974) Morphology of Angiosperms. Hutchinson.

SYSTEMATIC BOTANY**Module- I**

1. Introduction, scope and importance
2. Herbarium techniques: collection, drying, poisoning, mounting & labeling. Significance of herbaria and botanical gardens; important herbaria and botanical gardens in India.
3. Nomenclature - Binomial system of nomenclature, basic rules of nomenclature (validity, effectivity and priority), ICN for algae, fungi and plants.
4. Systems of classification - Artificial, Natural of Phylogenetic (Brief account only). Bentham & Hooker's system of classification in detail.
5. Modern trends in taxonomy - Chemotaxonomy, Numerical taxonomy and Cytotaxonomy (brief account only)
6. Study the following families: Malvaceae, Fabaceae (with sub-families) Rubiaceae, Apocynaceae, Euphorbiaceae and Poaceae.

PRACTICALS (SYSTEMATIC BOTANY)

1. Determine the systematic position of local plants comes under the syllabus based on their vegetative and floral characters
2. Students shall be able to describe the plants in technical terms and draw the L.S. of flower of two plants belong to each family and record the same.
3. Familiarization of herbarium techniques (Demonstration only)
4. Students shall submit images of plants, at least one from each family mentioned in the syllabus duly certified by HoD, at time of examination. The images of plants should be properly identified and they should carry details like systematic position, GPS location, date, morphometric details of floral parts, name of the student etc. Separate images clearly showing habitat, habit, inflorescence type, single flower etc. of the plant should be represented. The images can be submitted along with the photo album containing images of inflorescence mentioned under morphology.

 - 7 Pandey & Misra. (2008) Taxonomy of Angiosperms. Ane books Pvt Ltd.

ECONOMIC BOTANY

Module -I

- 1 Brief account on the various categories of plants based on their economic importance
2. Study the following plants with special reference to their binomial, family, morphology of the useful part and their uses.
 1. Cereals: Paddy, Wheat
 2. Pulses: Black gram, Green gram
 3. Oil: Coconut, Gingelly
 4. Fibre: Cotton
 5. Latex: Rubber
 6. Beverages : Tea, Coffee
 7. Spices: Pepper, Cardamom, Clove
 8. Medicinal plants: *Rauwolfia serpentina*, *Justicia adhatoda*, *Santalum album* and *Curcuma longa*.

PRACTICAL (ECONOMIC BOTANY)

- 1 Identify at sight the economically important plant produces and products mentioned in module III, and learn the binomial and family of the source plants, morphology of the useful parts and uses. (Drawing not required)

REFERENCES (ECONOMIC BOTANY)

1. Pandey B. P (1987) - Economic Botany
2. Verma V. (1984) - Economic Botany
3. Hill A.W (1981) - Economic Botany, McGraw Hill Pub

PLANT BREEDING

1. Objectives of plant breeding
2. Methods of plant breeding: a) Plant introduction b) Selection - Mass, Pure line and clonal, c) Hybridization : intervarietal, interspecific and intergeneric hybridization. d) Mutation breeding e) polyploidy breeding and f) breeding for disease resistance

PRACTICAL (PLANT BREEDING)

- 1 Demonstration of hybridization technique

REFERENCES (PLANT BREEDING)

- 1 Allard. R.W. (1960) Principles of Plant breeding, John Wiley & Sons, Inc, New York.
- 2 Singh, B.D. (2005) Plant Breeding - Principles & methods , Kalyani Publishers, New Delhi.
- 3 Chaudhari. H.K. Elementary Principles of Plant breeding, Publishers. Oxford & IBH

HORTICULTURE

1. Horticulture- introduction: definition, branches, significance
2. Methods of plant propagation:
 - a. Seed propagation
 - b. Vegetative propagation
 1. Cutting – stem, root, leaf
 2. Layering –air layering
 3. Grafting: Approach grafting, Tongue grafting
 4. Budding: Patch and T-budding

PRACTICAL (HORTICULTURE)

- 1 Demonstration of layering, grafting and budding References:- Horticulture
- 2 Text book of Horticulture - K. Manibhushan Rao - Macmillan India Ltd.
- 3 Introduction to Horticulture – N. Kumar (First Edition, Rajalakshmi Publication,1996)

**FOURTH SEMESTER COMPLEMENTARY BOTANY
COMPLEMENTARY COURSE 4:
PLANT PHYSIOLOGY, ECOLOGY AND GENETICS
Course Code: BOT 4 C 04**

COURSE OUTCOMES (COs)

By the end of the course, students are expected to:

1. Explain the physiological processes in plants.
2. Understand the basic principles of heredity and variation.
3. Realize the importance of ecology.
4. Spread awareness of the necessity of conservation of biodiversity and natural resources
5. Solve problems related to classical genetics

DISTRIBUTION OF TEACHING HOURS (18 hrs/Semester = 1hr/week)

Sl no	Subject	Theory	Practical	Total
1	Plant physiology	36	18	54
2	Ecology	9	9	18
3	Genetics	9	9	18
Total		54	36	90

QUESTION PAPER PATTERN & SUBJECT WISE DISTRIBUTION OF MARKS

Type of questions	Plant physiol.	Ecology	Genetics	Total
2 marks (total 12)	8	2	2	Ceiling 20
5 marks (total 7)	4	1	2	Ceiling 30
10 marks (total 2)	2			1x10 = 10
TOTAL				60

PLANT PHYSIOLOGY

Module - I

1. Structure of plant cell and cell organelles (Brief account only)
2. Water relations - Permeability, Imbibition, Diffusion, Osmosis and water potential
3. Absorption of water- Active and passive mechanisms
4. Ascent of sap -Root pressure theory, Transpiration pull or cohesion-tension theory.
5. Transpiration -Types, mechanism of stomatal movement: K⁺ ion theory, significance of transpiration, antitranspirants.

Module - II

1. Photosynthesis-Introduction, significance, Two pigment systems, red drop, Emerson enhancement effect, action and absorption spectra, Mechanism of photosynthesis - Light reaction, cyclic & non-cyclic photo phosphorylation, Dark reactions–Calvin cycle, C₄ cycle,

photorespiration (a brief account only). Factors affecting photosynthesis.

2. Respiration-Definition, Kinds of respiration-aerobic and anaerobic; Glycolysis, Krebs cycle, Terminal oxidation, Fermentation

Module - III

1. Plant growth-Definition, phases of growth, natural plant hormones, synthetic auxins (Brief account only)
2. Senescence and abscission, Photo-periodism & vernalization.
3. Dormancy of seeds- Factors causing dormancy, photoblastin, techniques to break dormancy, physiology of fruit ripening.

PRACTICALS (PLANT PHYSIOLOGY)

Learn the principle and working of the following apparatus/experiments

1. Thistle funnel osmoscope
2. Ganong's potometer
3. Ganong's light-screen
4. Absorbo transpirometer
5. Kuhne's fermentation vessel
6. Mohl's half-leaf experiment
9. Experiment to show evolution of O₂ during photosynthesis

- 3 G. Ray Noggle and George J.Fritz (1983) Introductory Plant Physiology Prentice Hall.
- 4 Goodwin Y.W., and Mercer E.I. (2003) Introduction to Plant Biochemistry. 2nd edition. CBS Publishers and distributors.

PLANT ECOLOGY

Module - I

1. Ecology-Definition, Ecosystem: ecological factors –biotic and abiotic.
2. Ecological adaptations: Morphological, anatomical and physiological adaptations of the following types: Hydrophyte (*Vallisneria*, *Hydrilla*), Xerophyte (*Opuntia*, *Nerium*), Halophyte (*Avicennia*), Epiphytes (*Vanda*) and parasites (*Cuscuta*).
3. Ecological succession –Process of succession, types of succession, Hydrosere

PRACTICALS (PLANT ECOLOGY)

Study the morphological and anatomical adaptations of the hydrophytes, xerophytes, halophytes, epiphytes and parasites mentioned in the syllabus (drawing not required)

REFERENCES (PLANT ECOLOGY)

- 1 Ambasht R.S. 1988. A text book of Plant Ecology. Students Friends Co. Varanasi.

- 4 Sharma, P.D. 2008-2009. Ecology and Environment. Rastogi Publication.
- 5 Kumar H.D. 1977. Modern Concepts of Ecology. Vikas Publications. New Delhi.

GENETICS

1. Introduction and brief history of genetics
2. Mendel's experiments, symbolisation, terminology, heredity and variation;
3. Monohybrid cross, Dihybrid cross, Laws of Mendel, test cross and back cross.
4. Modified Mendelian ratios 1) Incomplete dominance in *Mirabilis jalapa*
5. Gene interactions: Complementary genes -flower colour in *Lathyrus odoratus* (9:7ratio), Epistasis - Fruit colour in *Cucurbita pepo* (12:3:1 ratio).

PRACTICAL (GENETICS)

- 1 Students are expected to work out problems related to Monohybrid, Dihybrid, Test cross, Incomplete dominance and Modified Mendelian ratios and has to be recorded.

REFERENCES (GENETICS)

MODEL QUESTION PAPERS: (THEORY)

MODEL QUESTION PAPER: (PRACTICAL)

B.Sc. COMPLEMENTARY BOTANY PRACTICAL EXAMINATION

(Angiosperm Anatomy, Micro technique, Cryptogams, Gymnosperms, Plant Pathology, Morphology, Systematic Botany, Plant Physiology, Ecology, Genetics, Economic Botany, Plant Breeding & Horticulture)

Time: 3 hrs

Max: 60 marks

1. Prepare a T.S. of specimen **A**. Stain and mount in glycerine. Draw cellular diagram and label the parts. Identify giving reasons. Leave the preparation for valuation.

(Preparation-2; Diagram-2; Reasons-2; Identification-1)

7 x 1 = 7 Marks

2. Refer specimen **B** to its family, giving diagnostic characters

(Identification-1; Reasons-2)

3 x 1 = 3 Marks

3. Take a V.S. of flower **C**. Draw a labeled diagram

2 x 1 = 2 Marks

4. Make suitable micro-preparations of **D**. Draw labeled diagram. Identify giving reasons.

Leave the preparation for valuation.

(Preparation-2; Diagram-2; Identification-1; Reasons-1)

6 x 1 = 6 Marks

5. Determine the ecological group of specimen **E**, with important adaptations.

(Identification-1; Adaptations-2)

3 x 1 = 3 Marks

6. Identify the experiment **F and G**. Explain the aim and working

(Identification-1; Aim-1; Working - 1)

3 x 2 = 6 Marks

7. Give the binomial, family and morphology of useful parts in **H and I**

(Binomial-1; Family- ½ ; Morphology of useful part- ½)

2 x 2 = 4 Marks

8. Name the disease, pathogen and important symptoms in **J**

(Name- 1; Pathogen- 1 ; Symptoms-1)

3 x 1 = 3 Marks

9. Give the binomial and family of **K and L**

(Binomial-1; Family ½)

2 x 1 ½ = 3 Marks

10. Work out the problem **M**

5 x 1 = 5 Marks

11. Spot at sight **N to V**

9 X 2 = 18 marks

Practical	: 60 Marks
Record	: 15 Marks
Submission	: 10 Marks
Total	: 85 Marks

OPEN COURSES

FIFTH SEMESTER B. Sc. BOTANY DEGREE PROGRAMME

OPEN COURSE - Choice -1: GENERAL BOTANY

Code: BOT 5 D 01

COURSE OUTCOMES (COs)

By the end of the course, students are expected to:

1. Have a general awareness on various branches of plant science
2. Develop environmental concern
3. Realize the importance of plants in everyday life.

DISTRIBUTION OF TEACHING HOURS (18 hrs/Semester = 1hr/week)

Sl no	Subject	Total
1	Module 1	4
2	Module 2	6
3	Module 3	6
4	Module 4	12
5	Module 5	7
6	Module 6	7
7	Module 7	12
Total		54

QUESTION PAPER PATTERN

Type of questions	No of questions	Total
2 marks	12	Ceiling 20
5 marks	7	Ceiling 30
10 marks	2	1x10 = 10
Total		60

Module -1: Living World

Living and Non Living: Plants and Animals; Classification of plants-Eichler's system – general characters of each group with one example. An introduction to the Life cycle of plants.

Module - 2: Morphology of Angiosperms

Typical angiosperm plant: Functions of each organ viz. Root, Stem, leaves, inflorescence, flowers, fruit and seed. Flower: Basic structure - essential and non essential parts, symmetry. Pollination, seed dispersal of fruits and seeds.

Module - 3: Anatomy

Definition, general structure, Cell division- mitosis and meiosis, significance, cell cycle.

Tissues: simple , compound; structure and functions; Structure and functions of root, stem and leaves. Monocot and Dicot stem- general features; Secondary thickening. Annual rings, heart wood and sap wood.

Module- 4: Plant Physiology

General account on methods of absorption of water and nutrients; Osmosis, Diffusion, Imbibition. Transport of water and nutrients; transpiration and its significance. Mineral nutrients: macro and micro; deficiency symptoms Symbiotic nitrogen fixation and its significance. Photosynthesis- Light and Dark reactions-brief description, Respiration and Growth Hormones.

Module - 5: Genetics

Heredity, variation; Mendelian experiments and principles. Exceptions of Mendelism – Structure and significance of DNA; Mutation. DNA: as the Genetic Material; Blood groupism in man; Sex determination in man.

Module - 6: Plant Biotechnology

Tissue culture - Principle and procedure; Transgenic plants: Scope and applications, BT Cotton, BT Brinjal, Golden Rice; Bioreactors and their significance.

Module - 7 Environmental Science

Ecosystem: Structure - Abiotic and Biotic Factors, Ecosystem:, Types of plant interactions; Mutualism, Commensalism, Predation, Symbiosis, Parasitism, Competition. Biodiversity, Conservation, *In situ* and *Ex situ* methods, National Parks, Sanctuaries, IUCN, Threat Categories, Red list. Green House Effect, Ozone depletion, Deforestation and Reforestation, Alternative energy resources, Sustainable development and Utilization of resources.

FIFTH SEMESTER B. Sc. BOTANY DEGREE PROGRAMME
OPEN COURSE - Choice - 2: APPLIED BOTANY
Code: BOT 5 D 02

COURSE OUTCOMES (COs)

By the end of the course, students are expected to:

1. Develop general awareness on applied aspects of Plant science
2. Realize the role of plants in everyday life
3. Apply vegetative propagation methods in everyday life
4. Realize the economic importance of plants

DISTRIBUTION OF TEACHING HOURS (18 hrs/Semester = 1hr/week)

Sl no	Subject	Total
1	Module –I Plant Propagation	12
2	Module – II Steps of growing plants	12
3	Module – III. Botany in Everyday life	24
4	Module – IV. Economic Botany	6
Total		54

QUESTION PAPER PATTERN

Type of questions	No of questions	Total
2 marks	12	Ceiling 20
5 marks	7	Ceiling 30
10 marks	2	1x10 = 10
Total		60

Module –I Plant Propagation

1. Seed propagation – Seed dormancy, seed treatment, conditions for successful propagation, rising of seed beds, care of seedling, transplanting techniques.
2. Vegetative propagation:
 - (a) Cutting (stem, roots)
 - (b) Grafting (approach, cleft)
 - (c) Budding (T-budding, patch)
 - (d) Layering (simple, air)
3. Micro propagation- General account

Module – II Steps of Growing Plants

1. Soil- Composition, Types, Texture, Soil pH, Correcting pH, Humus
2. Pots & Potting – Earthen, Fibre, Polythene bags, Potting mixture, Potting, Depotting, Repotting.
3. Chemical fertilizers: types, application, merits and demerits

4. Organic manure; types, application, merits and demerits
5. Need of water: Irrigation – Surface, spray, drip irrigation, sprinklers.
6. Plant protection: Biological, Physical and mechanical, Chemical, biopesticide

Module – III. Botany in Everyday life

1. Vegetable gardening
2. Mushroom cultivation
3. Vermi composting- technique
4. Biofertilizer Technology
5. Orchid and Anthurium cultivation
6. Creating Bonsai

Module – IV. Economic Botany

1. General account on various plants of economic importance
2. Study the Binomial, Family, Morphology of the useful part of the following plants.
 - Cereals and Millets – Rice, Wheat
 - Pulses -Greengram, Bengalgram, Blackgram
 - Beverages – Coffee, Tea, Cocoa.
 - Fibre – Coir, Cotton
 - Timber – Teak, Rose wood, Jack
 - Spices – Pepper, Ginger, Cardamom
 - Medicinal – Adhatoda, Phyllanthus, Rauwolfia
 - Oil- coconut, Gingelly
 - Ornamental plants of economic importance – Rose, jasmine
 - Fruit – Mango, Banana

FIFTH SEMESTER B. Sc. BOTANY DEGREE PROGRAMME
OPEN COURSE- Choice -3:
BASIC TISSUE CULTURE
Code: BOT 5 D 03

COURSE OUTCOMES (COs)

By the end of the course, students are expected to:

1. Understand plant tissue culture as a rapid propagation method
2. Explain the steps involved in tissue culture
3. Realize the applications of plant tissue culture

DISTRIBUTION OF TEACHING HOURS (18 hrs/Semester = 1hr/week)

Sl no	Subject	Total
1	Module 1	7
2	Module 2	12
3	Module 3	9
4	Module 4	18
5	Module 5	8
Total		54

QUESTION PAPER PATTERN

Type of questions	No of questions	Total
2 marks	12	Ceiling 20
5 marks	7	Ceiling 30
10 marks	2	1x10 = 10
Total		60

Module - I .

1. Introduction; Aims and objectives of Plant Tissue Culture.
2. Organization and facilities of a Tissue culture Laboratory.
3. Equipment and apparatus in a tissue culture lab.
4. Sterilization techniques – Autoclaving Flame sterilization, UV irradiation, Chemical sterilization. Sterilization of instruments and glass wares, medium, explants

Module-II

1. Plant tissue culture – Principles and techniques: Cellular totipotency, *in vitro* differentiation –de differentiation and re-differentiation,.
2. Tissue culture medium – Basic components in tissue culture medium – Solid and liquid medium– suspension culture. Murashige and Skoog medium– composition and preparation.
3. Aseptic techniques in tissue culture - preparation of explants – surface sterilization.

Inoculation, incubation and subculturing.

Module-III

1. Micropropagation - Different methods – axillary bud proliferation, direct and indirect organogenesis and somatic embryogenesis.
2. Different phases of micropropagation – hardening, transplantation and field Evaluation: Advantages and disadvantages of micro propagation.
3. Somaclonal variation.

Module – IV

1. Applications of plant tissue culture: Micropropagation; Somatic embryogenesis; Artificial seeds, Germplasm conservation, Embryo rescue culture, Protoplast isolation, culture and fusion, Anther, pollen and Ovary culture for production of haploids, Cryopreservation. Shoot apical meristem culture and production of pathogen free stocks and somaclonal variation.

Module –V

1. Transformation technology – Transgenic plant production, Gene transfer methods in plants, Multiple gene transfers, Vector less or direct gene transfer techniques.
