

## REPORT

The Department of Computer Applications, Mercy College, Palakkad organized an

Industrial Visit to UL CyberPark, Calicut for the students of BCA. on 21st August 2025. The industrial visit helped the students to get practical knowledge about IT sectors and how to be part of it as fresher's. 41 students of BCA along with 2 faculty members of Mercy College Palakkad, visited UL Cyber Park Kozhikode at 10:30 a.m. We left our College at 6:00 a.m.

UL Cyber Park have many companies held in it. It was a great experience for us to get an opportunity to enter in such a large IT company. It comprises of several individual start- up's that is located in various floors. We all wandered the whole building with much curiosity and excitement. They spent their valuable time for guiding and giving suggestions regarding our career. Also, they gave a brief explanation about their company's infrastructure and facilities within the firm.

The visit to "CYBER PARK" was indeed a great opportunity for us to know and observe the functioning of real-world IT companies' scenario. We came to observe many things that we had studied in our books. The infrastructure of the company was very amazing. We saw the management of manpower in IT Field. We came to know the working environment of IT professionals. It was really inspiring for us. Through this visit we got many information about IT companies. The visit to startup companies motivated us. As fresher we got a clear picture about IT field. The new technologies implemented in the company made us to improve our knowledge. Every start-up in Cyberpark not only helped us in knowing more about IT sectors but also provide us a clear idea on managing these sectors of different approaches. For every sector the quality of product and services that they ensure to customers was one of the key points in these sectors.
