CERTIFICATE COURSE ON BASICS OF PYTHON PROGRAMMING.

The Postgraduate Department of Mathematics and Statistics, in collaboration with the Department of Computer Science, jointly organized a Certificate Course on the Basics of Python Programming. This initiative is part of the departments' continuous efforts to promote technical skills and computational thinking among students and aspiring learners.

Registration for the course is completely free, making it accessible to all interested candidates regardless of their academic background. Experienced faculty members from both departments conducted the classes, which began on 23rd July 2025. The course was successfully completed on 13 March 2026, with the participation of 43 students. Faculty members from both departments took the sessions. The course utilized classroom facilities from both the mathematics and computer science departments.

Python, being one of the most popular and beginner-friendly programming languages, is widely used in various domains such as data science, web development, artificial intelligence, automation, and more. Understanding its basics not only provides a solid foundation in programming but also opens doors to numerous opportunities in the field of technology and research. The course is designed to introduce participants to the fundamentals of Python programming, including basic syntax, data types, control structures, functions, and simple applications. It is particularly beneficial for those who are new to programming or wish to build a strong coding base.
