TUITION PROGRAMME FOR SCHOOL STUDENTS

PG Department of Mathematics and Statistics organized a Tuition Programme for School Students on 15th July 2025 from 4:10 pm to 5:20 pm at kanikkamatha school, Palakkad, with the aim of supporting school students in their academic learning and improving their understanding of basic concepts. The programme was conducted as part of the department's outreach initiative to assist students who need additional academic guidance. The programme started with a brief introduction about the importance of education and continuous learning. The sessions were handled by the students of the Department of Mathematics, who provided guidance and support to the school students. The tuition sessions were handled by the student tutors Varsha M, Naishana A, Gopika S, and Anaswara A from the Department of Mathematics. They guided the school students in clearing their doubts, and strengthening their fundamental concepts. The tutors explained different topics in a simple and interactive manner, which helped the students to understand the subject more clearly.

At the beginning of the programme, the number of participating students was comparatively low. However, as the sessions progressed, more students joined the programme after realizing its benefits. By the end of the programme, the tuition classes maintained an average participation of around 18 students. The tuition programme was also beneficial for the student tutors. It provided them with an opportunity to earn while they learn, helping them to support their daily basic expenses. At the same time, the programme helped the tutors to improve their teaching skills, communication abilities, and subject knowledge through practical experience.

The programme received positive feedback from the participating students and proved to be helpful for both the learners and the tutors. The tuition programme is scheduled to conclude on 17 March 2026.
