

REPORT ON 'EMPOWERING ONE ANOTHER'-A COMMUNITY PROJECT

A programme for empowering women was conducted on 14 October 2025 by the Department of Computer Science, Mercy College, Palakkad. The initiative aimed to promote self-confidence, independence, and awareness among women regarding their rights and opportunities. The programme was attended by women participants from the local community, along with students and faculty members of the department. The sessions focused on various aspects of empowerment, including education, digital literacy, career opportunities, and financial independence. The programme also highlighted the importance of technology in empowering women and enabling them to access information and opportunities more effectively. The event was successfully conducted with enthusiastic participation. It played a significant role in motivating women to become more self-reliant and confident in facing challenges, and was appreciated by all those who attended.
