REPORT ON WORKSHOP ON COMPUTER HARDWARE

The Department of Computer Applications, Mercy College, Palakkad, organized a Workshop on Computer Hardware for the first-year BCA students of the 2026 admission batch. The session was handled by Mr. Ajith Kumar A., System Administrator, Mercy College, Palakkad. The workshop aimed to introduce students to the fundamental components of a computer system and provide practical knowledge of computer hardware.

During the workshop, the resource person explained various hardware components, including the motherboard, HDD, SSD, RAM, processor, ports, and active and passive components. He discussed their functions and importance in the proper functioning of a computer system. The session also included a practical demonstration of the assembling and disassembling of computer hardware components, helping students understand the internal structure of a computer and the connections between its different parts.

The workshop provided students with valuable hands-on exposure to computer hardware and enhanced their understanding of the basic concepts of computer systems. It also helped bridge the gap between theoretical knowledge and practical application, creating a strong foundation for their further studies in computer applications.
