MERCY MENTORING

Mercy Mentoring is an initiative taken by PG and Research Department of Botany, Mercy College, Palakkad. This programme is the extension activity and one of the best practices of the department with an intension of augmenting scientific specimen repository in schools. The specimens given to the schools were collected by the PG botany students and were properly checked by teachers. Moreover, the given specimens were explained by teachers and PG students in order to make them familiarize with each and every nuance of botany. This programme will provide school students a chance of experiencing the specimens which they meant to study in their text books. On 30th November 2023, teachers, student teams and coordinators of botany department have taken a move to K.C.E.M.G.H.S.S school, Palakkad and met plus one and plus two students with specimens of Algae, Pteridophytes, Plant plathology herbarium sheets and with few prepared permanent slides. Furthermore, the team explained the method of preparation of the samples they brought. It was a very good experience for both the donor and receiver that led to enrich the Knowledge with skills and techniques applied which reflected in the feedback of benefited students.
